## SUMAS DISTRICT

Mr. J. D. Leavitt has returned from a business trip to Kamloops. Mr. MacInnis, former resident of Huntingdon, is working for Mr. Coulson, contractor, at Nanaimo.

Mrs. Alex. Houghton, assisted by Mrs. Frank Aish, entertained the Upper Sumas Social Club on Thursday.

Mrs. Fred Corbet's mother, Mrs. Huggard, had the misfortune to fall and break her arm.

Mr. and Mrs. Collett of Merritt visited their cousins Mr. and Mrs. J. T. Hunter last week.

Mrs. Alex. Buchanan and son of Vancouver were recent guests of her parents, Mr. and Mrs. Albert Lee.

Hunters will be glad to know big flocks of "northern" mallards are to be seen daily on the prairie.

Tom Stratton and Arthur Keeping have returned from a hunting trip in the Cariboo.

Mrs. James Wilson, who has spent some time with her mother, Mrs. Mary McAdam, left on Friday to join her husband at Sointula, B.C.

Mr. and Mrs. Bill Buchanan have returned from a motor trip of Eastern Washington which included Coulee Dam.

Page Don McKenzie—The Upper Sumas road which bears heavy traffic needs his grading service, as does the McCallum road.

Ladies of the Hall Association are holding an opening dance in the renovated agricultural hall—now said to be the best in the district. Proceeds are for the furnace fund (See announcement).

Sixteen members were present at a meeting of Upper Sumas Women's Institute at the home of Mrs. Luther Lamson on Thursday. An apron contest was held, and the articles will later be sold.

Miss Pearl Grieve was named president of Sumas P.T.A. at the annual meeting held in Whatcom road school. Mrs. Perry Starr was chosen vice-president, and Mr. Church will be secretary. A useful year's activity is anticipated.

Mrs. Milton Nelles gave a surprise birthday party recently for her sister, Mrs. Tann, who is here from Ontario. On this occasion her friends made her a nice presentation. Mrs. Tann left on Saturday to visit relatives in Everett before returning to the East.

Social Club women of Sumas held their annual "husbands' night" in the agricultural hall on Wednesday, when a happy program ensued. Court whist was played, Mrs. Sam Austin and Mr. Thos. Lindsay winning first prizes, Mr. Sam Austin and Mrs. Denis Malpas consolation prizes. An enjoyable supper concluded the evening.

Jay Starr has gone into Sumas' newest industry, shingles, and is busy with his partners piling up a presentable yard stock of Seven X—which is the ranking standard of local cedar. Sumas shingles are being delivered far and wide over the district—to most of the new jobs, in fact.

"Johnnie" Bates, former Customs Examiner at Huntingdon, passed through Abbotsford on Friday en route home from the Cariboo to Vancouver. He had a bear and some moose meat to show for his excursion in the Horsefly district. While there he met Bill Groat and Councillor Ferd. Matthews.

Good average prices were obtained at the auction sale of ex-Reeve C. A. Lamson's dairy herd by Auctioneer Plaxton last week, top price going to \$78 and the lows down to \$25. Mr. Lamson, because of his disability, will confine himself to grain growing. He is slowly improving, although the stroke he suffered prevents him from doing active work.

Mr. Percy Fredrickson of Mt. Lehman sustained the loss of several fingers on his right hand, in an accident at Powell River.

## S. Africa Librarian Inspects F.V. System

Recent visitor to Abbotsford and the Fraser Valley was Mr. R. F. Kennedy, public librarian of Johannesburg, South Africa. Mr. Kennedy is on an inspection tour of France, Britain, Canada, the United States and New Zealand, in behalf of the Carnegie Corporation, the Union of South Africa, as well as his own library. Although the objectives of his research are primarily urban library service, he was particularly to include in his itinerary the Fraser Valley Union Library as a rural public library which has aroused interest among librarians round the world.

Mr. Kennedy spent a day on the book-van, taking one of the regular routes in this district. He was very much impressed with the efficiency of the service, the direct contact with the public, and the class of books, both fiction and non-fiction, which Valley readers are interested in.

The Johannesburg Public Library serves a population of about 250,000 ("European" population only), and operates on a financial basis of 80 cents per capita, an interesting comparison with the 35 cents per capita basis in the Fraser Valley, and still less in Vancouver.

Another visitor to the Abbotsford library headquarters is Mr. B. A. Ower of Edmonton, Alberta, who is doing voluntary work and at the same time studying regional library methods, particularly from the point of view of school library service. Mr. Ower is a graduate of the University of Alberta, and took his library training in McGill University, subsequently doing graduate work at Columbia University.

## NOT ENOUGH INTEREST IN RECREATION CENTRE CLASSES

Visitors tell us the M.S.A. Recreational Centre provides the finest facilities of their kind in the province outside Vancouver. Yet the enrollment both in physical training and manual crafts classes is not commensurate. Personal development is the keynote of today's competitive existence, and no man or woman, no matter what age, can afford to overlook opportunities for this instruction and training when fine equipment and competent instructors are brought right to their door largely at government expense. Young people, even more than elders, need such trainings.

Men's gymnastic classes are held in the Auditorium of the high school on Monday and Thursday evenings, women 7.30 to 9, men 9 to 10.30. An election of the membership committee takes place in the high school on Oct. 21.

## MATSQUI

Born.—To Mr. and Mrs. H. G. Rottluff, Matsqui, in the M.S.A. hospital October 15, a son.

Miss Freda Mundy has returned home after spending the summer at Ashcroft.

Messrs. J. Smith, L. Swanson, W. Frost and O. Fore have returned from a hunting trip in the Cariboo.

Miss Agnes Blacklock and Jim Blacklock are home from a two-week visit with relatives at Powell River.

Mr. and Mrs. MacDougall were hostesses at an evening party last week. Winners at cards were Mrs. Kelleher, Mrs. J. H. Smith, Mr. B. Sanders and Mr. France.

Mrs. J. Fredrickson of Matsqui visited her daughter and son-in-law, Mr. and Mrs. Wilmer McHardy in Vancouver over the week-end.

## Stop-Watch Checks Precision of French Ballet

Precision leg work of the famous "Fetes Francaise" ballet troupe is timed by Gene Snyder, co-director of the group. The revue, which was one of the hits of the Paris International exposition, arrived in New York recently for an engagement at a leading night club.

## Crow "Not So Black" Say Biologists

IN defense of the practice of wholesale crow slaughter, certain sportsmen and ammunition manufacturers have advanced the argument that the crow is the arch-enemy of the wild duck, regularly ravaging the water-fowl's nests in the Canadian breeding grounds, and therefore should be destroyed on every occasion, especially by organized hunts. There is some truth in the claim of crows destroying duck eggs. The evidence should be examined.

E. R. Kalmbach of the United States Biological Survey conducted an investigation which showed that of 512 duck nests studied, 31%, or 156, had been ravaged by crows. But the survey was made in an area where crow concentration is unusually high. He points out that the overlap of crow range and duck nesting area does not represent more than one-sixth of the whole waterfowl nesting area in Alaska and Canada.

Killing crows at their winter roosts—a practice persisted in by many hunters under the encouragement of powder companies—prizes—is of little benefit with respect to

waterfowl, Mr. Kalmbach holds, because only part of the roosting birds can be held responsible for destroying duck eggs. He declares:

"Crow control operations on duck breeding grounds should by all means be entrusted only to those who fully recognize the hazards associated with human intrusion on waterfowl nesting ground. The work should not be carried out haphazard or by mass action devoid of careful supervision."

The question of whether crows are useful or pernicious—like the status of the English sparrow, and now the starling in the United States—has long been debated. Undoubtedly there are spots where concentration of crows makes them a nuisance and harmful to crops and to other wild life. The last word on the crow, however, may be left to the United States Biological Survey which declares after a very painstaking survey in all parts of the country that this much maligned bird is more helpful than harmful. —Christian Science Monitor.

One way to make your wife sit up and take notice is to talk in your sleep.

The original negative of this picture is about the size of a postage stamp. It was snapped from the second row of a theater on ultra-fast film with the lens at f.2, the exposure 1/25 second at a moment of slight pause in the action.

THE frequent appearance in magazines and newspapers of striking "off-guard" snapshots of prominent persons, such as society folk dining in a restaurant, or "series shots" of the changing expressions of an after-dinner speaker, prompts from many readers the question, "How were these pictures taken?" The answer in the case of many of these pictures is the high-speed, large-lens miniature camera and the new ultra-fast film, which in combination often make possible snapshots at night without extra illumination of the subject.

The use of miniature cameras, not alone for "off-guard" photography but for daytime portrait studies and "scenic" of which they are also highly capable, has grown with startling speed. Films are available that are especially suited to this kind of work. These pocket-size but powerful, precision-built cameras seem to have for many the fascination of the high-powered automobile and are bought despite their higher cost, because "you can go places with them."

Just what is a high-speed miniature camera? Essentially it is a very small roll-film camera with a very large aperture lens such as one rated at f.2. The exposure required with an f.2 lens is only 1/9th of that needed for the f.6.3 lens which is considered a "fast" lens on the ordinary amateur camera.

Without going into the technical reasons, it is possible to use a much

larger and consequently much faster lens on a miniature camera than would be practicable on the average size camera. The small size, the ultra-fast lens combined with new extra-fast film, make it possible to snap pictures under conditions which are difficult for larger cameras with slower lenses.

You can carry a "minnie" around in your pocket and whip it out for any occasion. With good judgment for correct exposure you can make snapshots on the stage of a theater, in a night club, at a prize fight or at night on a brightly illuminated street.

Miniature camera negatives must, of course, be enlarged to obtain prints satisfactory to look at. Some miniature cameras use 35-mm. motion picture size film and give up to 36 pictures to the roll; others use somewhat larger sizes, 8 or 16 pictures to a roll. Owing to the relatively low cost of the small-sized film, the expense per picture for average-size enlargements is not much greater than a contact print from the larger film used in a camera of ordinary size.

The technique of taking pictures with a miniature is not much different from that with the ordinary focusing camera, but there is a valuable point to remember. Because of its light weight and small size, it is more difficult to hold a miniature camera steady. Since sharp negatives are essential in this work, steadiness is of prime importance.

John van Guilder.

## American Wheat To Be Sold in F. Valley

Unusual was a shipment of six carloads of feed wheat, entering British Columbia through the Port of Huntingdon this week. Billed from Seattle, and originating in the eastern irrigated lands of Washington and Oregon, the grain was destined to Vancouver brokers and will probably find outlet among Fraser Valley farmers through the feed distributing concerns. It is understood Surrey Farmers Co-operative and Buckfield's Ltd. are taking some of it.

Vancouver quotation for wheat of a similar grade (No. 6) is 83 cents a bushel. Tariff upon the U.S. grain amounts to 15 cents a bushel.

Bride-Elect Honored by Friends

A pleasant evening was spent at the home of Mrs. Jas. Berry, Kingsley Cottage, last week, when Miss Marguerite Harkles, a bride-elect, was honored.

After cards and games, the guest of honor was seated beneath a decorated light and presented with a decorated basket filled with gifts. The presentation was made by two grand-children of the hostess, little Miss Edna Berry and Master Marvin Bell, who were dressed as a bride and groom.

Dainty refreshments were served by the hostess, assisted by her daughter Miss R. Berry, granddaughter Miss Joyce Berry and Mrs. Harkles, mother of the bride-elect.

The A.-S.-M. Welfare Club is to start its annual drive for contributions on October 20, and it is hoped response to the worthy movement will be equally as liberal as last year. It is asked that no donations be given to persons not holding proper credentials.

## Free Vaccination for M.S.A. Area Children

Free vaccination against smallpox will be available to children of both school and pre-school age, in the M.-S.-A. area shortly, states Miss M. C. Miles, head of the public health staff. Parents wishing their children vaccinated are asked to sign and return the forms which will be distributed through the school. The vaccinations will take place at clinics to be held at a set date in the schools.

While there have been no wide-spread smallpox epidemics in Canada since 1934, in that year the city of Windsor, Ont., and the surrounding district reported 67 cases, 32 of which were fatal.

In the Windsor epidemic:  
(a)—No one vaccinated successfully within 12 years contracted smallpox.

(b)—No one ever vaccinated successfully, no matter how long ago, died of smallpox.

(c)—Of the smallpox cases in persons who had never been successfully vaccinated, 71 per cent. died.

(d)—Vaccination of almost the whole population stopped the epidemic abruptly and completely.

Medical authorities do not say that vaccination is infallible, but that, in the great majority of cases, it spells complete protection from smallpox.

The Province of Quebec has a compulsory vaccination law; no child is permitted to enter school in that province without having been vaccinated. In the Province of Ontario there is no such law. During the year 1929-30 there were 159 cases among the 2,734,600 people in Quebec and 745 cases among the 3,313,000 people in Ontario. The rate in Ontario is nearly four times the Quebec rate.

Anti-vaccinationists, on the other hand, present claims designed to indicate constitutional damage in certain cases as a result of introducing smallpox serum into the body.

Engineer Murray of New Westminster, was in Abbotsford this week taking levels for the new water system projected for early construction.

Bill Combs and several other local nimrods, went by truck into the Quesnel district last week, returning with a moose.

## MATSQUI HALL ASSOCIATION BIG HALLOWEEN DANCE

MATSQUI HALL  
FRIDAY, OCTOBER 29  
Lobban Sisters Orchestra

## Loyalty Is Needed

To all who are interested in the development of the Hudson Bay route as a means of transport for commodities in and out of the Canadian west, and that should mean all residents of the prairie provinces, statements appearing in the 1937 report on Hudson Bay marine insurance rates by the Imperial Shipping Committee should convey assurance for the future of the short route between Europe and the middle west of the northern part of this continent.

The report announces reductions in, and advantageous changes in conditions relating to, marine insurance rates on cargoes handled through Churchill, indicates a potential lengthening of the shipping season for the route and, above all, for the first time in the eight years the route has been in operation, the committee voices its confidence in the comparative safety of the route, as expressed in the following excerpt:

"Eight seasons have passed since the new route was opened. The way is well charted and well equipped with aids to navigation. The exceptional circumstances on account of which the warranty is imposed—ice, fog and magnetic disturbance, are known and have been provided against by the gyro compass, direction finding and the very efficient escort of the Canadian patrol vessels.

"It is true that should a casualty occur, some time might elapse before salvage operations could be undertaken, and should the casualty be a very serious one or one which occurred towards the close of the season, salvage might be impracticable. Even though a Canadian government patrol vessel happened to be available for salvage operations, to suspend its normal activities of escorting other vessels might have unfortunate results.

"Nevertheless, so far as physical risks are concerned we are convinced that the Hudson Bay route is no more dangerous, and in some respects less dangerous, than the St. Lawrence route. As against this there still remains the fact that with the present small number of voyages a single total loss in a season is a serious matter for the underwriters."

An excellent feature of the report is the announcement of a reduction in marine insurance rates of 2s. 6d. per cent. on cargo carried in vessels using a gyro compass. This is a very desirable proviso, as it is essential that boats making use of the route be equipped with as many as possible approved devices calculated to lessen the risk of navigation through the strait and in the bay.

The "Avon River", the sole casualty of the 1936 season, which was driven on a reef without loss of life, was one of two boats using the route last year which did not carry a gyro compass.

It is true, however, that the lack of a gyro compass was not the cause of the disaster to the "Avon River". The committee quotes the London Board of Trade as declaring that the disaster was due "not to any special perils of the route, but to the unusually severe weather conditions which were experienced throughout the world in the latter part of 1936, during which an unusually large number of ships were lost."

The basis on which the reductions have been made and the establishment of the gyro compass as standard equipment for well-founded tramp steamers using the Hudson Bay route give some assurance that decrepit old hulks are not likely to use the route and thus imperil its growing prestige by foundering and imperilling the present rate structure.

Despite the favorable nature of the report, the reduction which has been made in the insurance rates and the encouragement which is being given to ensure safety measures, prejudice against the route in Eastern Canada and apathy in the West as to its fate in the future have not entirely disappeared. Only recently in the mouthpieces of financial interests in the east have appeared evidences of prejudice in the form of attacks against the route, founded principally on a material reduction in traffic through Churchill this year and the fact that this infant route is not yet on a self-sustaining basis.

The tenor of such articles is grossly unfair as they omit to tell the whole story. No reference is made to the fact that the West is suffering from the greatest drought in history, resulting in a lack of grain available for shipment, nor is it pointed out that during the season futures prices have so closely approximated cash grain prices as to make lengthy storage economically unfeasible.

These attacks indicate that the enemies of the route are not sleeping and it behooves the people of the west to demonstrate their loyalty to the Hudson Bay route by giving it their support on every possible occasion and in every possible legitimate manner.

If consumers in the prairie provinces, farmers in the country and business men in the urban centres would make it their business to express preference for goods shipped through Churchill their demands, if sufficiently insistent and persistent, would ultimately bear fruit and result in the increased volume of traffic which is essential if the route is to be speedily built up to sizeable capacity. If more goods are brought in through Churchill more boats will make use of the port for outbound cargo and the greater the speed with which traffic is developed the sooner will rates be further reduced.

### Perfect Gasoline Tank

**British Invent Tank For Aeroplanes That Will Avoid Danger Of Fire**

Gasoline fires after aeroplane crashes may soon be a thing of the past. The Air Ministry has perfected a gasoline tank which is crash, leak and fireproof. Following success of 13 years of experiment, the safety tanks will be placed in both war planes and civilian planes. In trials the tanks were fired at with incendiary machine-gun bullets. There was no resulting fire. A tank was dropped on concrete when a plane was deliberately crashed at 50 miles an hour. The tank merely bounced, and not a drop of gasoline was spilled.

Greater London's luxury trades including millinery, jewelry and clothing now find employment for 58,000 persons.

### THE TRINDL ELECTRIC ARC WELDER

Wonderful new invention. Operates from 6-volt battery. Welds—Solders—Brazes \$4.50 Delivered R. H. ANDERSON, LINDSAY, ONT.

### Definitely Under Par

**Harvard Scientist Has Discovered Sun Is Anaemic**

The sun is only sevenths as bright as it should be among stars of its type, it was disclosed by research at Harvard University. In the same study, made by Dr. William A. Calder, it was reported that the moon is slightly brighter than astronomers hitherto have believed.

Harvard observers, commenting on the discovery, resulting from a new determination of the radiations emitting from the sun and moon, said that it gave scientists their first indications that the sun definitely was "under par."

Once a year Buddhist worshippers fill a Tokyo temple, pray and offer incense in gratitude to the spirits of silkworms and cotton plants for their "sacrifice" in giving silk and cotton to mankind.

One wonders how much of Canada is really seen by all the tourists who try to cover as much ground in 24 hours as their cars and constitutions will stand.

### Proper Lighting Needed

**Prevalence Of Defective Eyesight Due To Poor Illumination**

The fact that more and more people are now using their eyes indoors at severe visual tasks, and neglect of proper lighting conditions are responsible for the prevalence of defective eyes according to Chas. O. Bick, clinical instructor of the College of Optometry of Canada, writing on "Must we wear specs?" in the current issue of "Health", organ of the Health League of Canada.

Glasses alone can never bring relief when eyes are abused by prolonged use under the harmful lighting conditions which exist in most offices and homes, writes Mr. Bick.

Most levels of illumination have far reaching effects on almost all bodily functions, he claims. "At present only a beginning has been made in the effects of illumination on the home seeing-machine."

Employers of labour should see to it that factory workers and office workers are given an opportunity of working under better visual conditions, the writer claims. "We expect them to do their work efficiently and they should be given the means to do that work efficiently." Elimination of useless waste of energy on their part will result in increased productive work for employers.

### Habitual Criminal

**Spinal Fluid Is Said To Reveal This Tendency**

Two Chicago doctors said that nine years' research led them to believe they could determine whether a criminal was a "confirmed repeater" by examining the "curve type" cells of his spinal fluid extracts. The doctors, S. W. Brownstein, of the Board of Health, and M. H. Levy, of the Cook county jail staff, said microscopic examination of spinal extracts of criminals disclosed a ratio between the men's tendencies to re-enter a life of crime and an abnormal cell count. Nine prisoners who had proved themselves habitual criminals were used in experiments.

### ALICE STEVENS' RECIPES

**BALANCED MENUS CONTAIN SIX FOODSTUFFS**

We hear a good deal these days about balancing budgets in the home as well as in political and business circles. Balancing menus is equally important.

Many housewives fight shy of the term "balanced menus" because they do not understand the meaning of the term. A balanced menu is one that keeps the body in health and supplies the necessary food for growth.

A diet must contain six foodstuffs to meet these requirements. Fats and carbohydrates are required to supply the body with heat and energy. Starches and sugars are included as carbohydrates.

The body requires food for new growth and for repairing old broken down tissues. This is supplied by protein foods in the diet. Some of the more common protein foods are egg white, milk, peas, beans, fish, meat and cheese.

Mineral matter, water and vitamins are needed to regulate our bodies and to keep them running smoothly. Vitamins are said to correspond to the spark of the engine. These three food stuffs are found in a number of foods but are particularly abundant in milk, eggs, fruits and vegetables.

All of these foodstuffs are found in the following menu: Liver Casserole, baked potatoes, creamed carrots, brown bread and butter, apple crumb pudding.

#### LIVER CASSEROLE

2 onions  
2 apples  
1½ pounds calf liver  
2 medium potatoes  
Salt and pepper  
1 teaspoon sage  
Cut onions up fine. Put liver in boiling water. Lift out after a few minutes. Put a layer of liver in the casserole. Add one layer of each, onions, potatoes, and apples. Add salt, pepper and sage. Repeat with layers of liver and other ingredients. Have a layer of potatoes on top. Add one cup stock or boiling water. Bake 1 to 1½ hours.

#### APPLE CRUMB PUDDING

8 to 10 apples  
¼ cup sugar  
Cinnamon  
¼ cup butter  
¼ cup brown sugar  
¼ cup flour  
Peel the apples and cut into thin slices. Pile in a buttered baking dish and continue until the dish is almost full. Sprinkle with ¼ cup sugar (white or brown) and cinnamon. Prepare the crumbs for the top by creaming together the butter, brown sugar, and flour. When this mixture is worked together so that it resembles fine bread crumbs pat it on top of the apples. Bake about 20 minutes or until the apples are soft and the top is a golden brown.

Readers are invited to write to Alice Stevens' Home Service, Penticton, B.C., for free advice on home cooking and household problems. (Please mention this paper).

An order issued by the Ulster Home Office in Ireland forbids cyclists to ride more than two abreast, under penalty of a fine.

### Island That Grows

**Fantastic Growth Of Island In The Danube River**

The case of an island that grows is now concerning the Hungarian legal world.

About 50 years ago the village of Dunapentele sold a little island of three acres to the church community of Dunavese for a small sum.

Instead of diminishing in size, like other islands in the Danube, the little island grew steadily bigger, and has now attained to about 19 acres.

The fantastic growth of the island has annoyed its former owners, who now claim payment for the acres which have, literally, materialized since its sale.

The church community, on the other hand, refuse to make further payment on the grounds that they bought and paid for the whole island. —London Observer.

### Will Have Quiet Winter

**Young Princesses Not To Be Seen Much In Public**

It is no secret that the Queen has been much exercised about the effect on her little daughters of their many public appearances this summer. August at Balmoral was maintained in family privacy, and it is likely that the little girls will make few appearances in the Autumn, says the London Daily Telegraph. In the Christmas holidays, a pantomime, the circus and a fairy play, with one or two children's parties, will naturally be allowed by the Queen. Dancing lessons will be held at the Palace and swimming lessons at the Bath Club. Both Princesses will work especially hard at their languages this winter. The Duchess of Kent takes great interest in this branch of their studies and talks French and German with her elder niece.

#### ARTICLE No. 11

**Prevention Of Cancer No. 3  
Medical Education**

The Hon. Dr. John M. Robb, former Minister of Health for Ontario did a fine job for the medical profession and public by his enterprise in setting up the first Royal Commission on Cancer instituted in any country, and by the subsequent establishment of the existing cancer clinics in that province.

The wealth of clinical material in hospitals of all kinds all over Canada has never been utilized to its full extent. The average doctor, unless he is ambitious enough to secure post-graduate education at his own expense, has heretofore learned little about cancer since he left college. The distribution of the King's Fund, although the amount available is ridiculously small, will afford an opportunity for the Canadian Medical Association to offer access to clinical instruction in hospitals and special cancer institutes.

The Cancer Committee, originally instituted by the Health League, is engaged in the preparation of a booklet for doctors on cancer. In this booklet, the work of men eminent in the various phases of cancer diagnosis, treatment and the latest developments on the subject will be discussed. In respect to this devastating malady, a new sense of responsibility has arisen in the ranks of the medical profession. The result of this is bound to be seen in the fight against cancer.

In the conquest of cancer, a huge sum of money is needed, money for medical education, for the education of the public, for investigation and research and for the uncovering of the frauds of quack cures. There are enormous hoards of wealth in Canada. Will not our wealthy friends, none of whose families are immune to cancer, loosen their purse-strings and join in the battle against one of the cruellest diseases which affects mankind?

Next article: Prevention of Cancer No. 4. Education of the Public in Cancer.

Editorial Note: Readers desiring the complete set of Dr. McCullough's cancer articles at once may secure same by writing to: The Health League of Canada, 105 Bond St., Toronto, Ont.

## THE FLAVOR LASTS

### Great Bear Lake Mine

**Important Pitchblende Find Located At Considerable Depth**

What is characterized by President A. LaBine, of Eldorado Gold Mines Limited, as "the most important pitchblende discovery underground since the commencement of operations on the property" is reported from the Great Bear Lake Mine of the silver-radium producer by Mine Manager E. J. Walli.

"Crosscutting from the No. 2 vein at the 590 horizon with the objective of reaching No. 1, the discovery vein, which has hitherto been completely unknown below the surface, what appears to be the downward projection of No. 1 vein to that depth has been reached," Mr. LaBine states. "Drifting has now continued for 70 feet and has yielded the most important pitchblende orebody found to date on the property. At last reports, the face was still in ore."

When Gilbert LaBine made his original discovery on what is to-day LaBine Point and the site of one of the greatest potential radium producers in history, what he found were the surface outcroppings of No. 7 vein. In earlier work with hand steel, a surface pit was opened for a distance of 20 feet and about 10 tons of ore was broken out of the vein. The surface samples were scientific rarities, much sought by museums throughout the world. Geologists who visited the property in the sub-Arctic at various times continued to offer the opinion that No. 1 vein was the principal vein. But development work was first begun on No. 2 vein which showed consistently rich pitchblende and silver as well as copper. This development and the actual operations continued on No. 2 vein to a depth of 590 feet.

### Quite Blameless

A Vermont village pastor, who had a weakness for trout, preached against fishing on Sunday. The next day one of his parishioners presented him with a fine string of fish and said, hesitatingly: "I guess I ought to tell you, parson that those trout were caught on Sunday."

The minister gazed appreciatively at the speckled beauties, and said, "The trout aren't to blame for that."

To tell summer temperatures correctly, a popular science note informs us, all you have to do is count the number of times a tree cricket chirps in a second, and add 40. Another way is to look at the thermometer.

Asia's non-Christian Confucianist-Taoist sect had 850,600,000 believers, the largest religious following in the world.

### How The Language Grows

**The Word Telegraph Was First Used In 1792**

The word "televisor" was coined by J. L. Baird in 1925 to describe apparatus for television and was registered by him as a trade mark. On account, however, of the general adoption of the word in the United States and elsewhere to denote any kind of television apparatus, Baird Television, Ltd., has decided to abandon its registration as a trade mark, so that in future there will be no restriction upon the use of the word in connection with television. "Televisor" may thus be used in future as freely as "telegraph" and "telephone".

The word telegraph was first applied by Chappe in France, in 1792, to his invention of the semaphore system of transmitting messages to a distance; and the word telephone was used by Sudre in 1828 for a system of signaling by musical sounds. It was employed in 1844 to describe a powerful wind instrument to convey signals at sea during foggy weather.

Philipp Reis, in 1861, called his ingenious instrument a telephone, so that he may be regarded as the inventor of the name of the modern instrument. Alexander Graham Bell adopted the word in 1876 for his "Electrical Speaking Telephone."—Nature.

### Sees End Of Drouth

**Professor Predicts Bountiful Harvests For Next Year**

Cycle of dry years which has ruined grain lands on the southern Canadian prairies has ended and bountiful crops likely will be harvested next year, it was forecast by Dr. Frederick James Alway, famous Ontario-born agronomist at Edmonton, in an interview.

Dry years occur in definitely traceable cycles, he said, and "the one which this year has caused such dreadful ravages throughout the grain belts of Canada and the United States is ending now, probably is already finished."

"I am prepared to state without hesitation that it is likely to be one of the wettest, most productive crop years in decades, and it is a pleasure to be able to make such a forecast with sincerity after witnessing what I have seen in Saskatchewan this summer," asserted Dr. Alway, professor of soil chemistry and chief of the division of soils at the University of Minnesota since 1913.

Dentist: "There's no need to make all that fuss, sir. Why, I haven't touched your tooth yet."

Patient: "No, but you're standing on my corn."

## Cut Down Food Wastage

--- by covering all perishable goods with Para-Sani Heavy Waxed Paper. Para-Sani moisture-proof texture will keep them fresh until you are ready to use them.

## Development Of Markets Is Urged To Assist In Agricultural Rehabilitation

A three-fold program of rehabilitation of Canadian agriculture was laid before the Canadian Chamber of Commerce at Vancouver by Hon. D. G. McKenzie of Winnipeg, former minister of agriculture and immigration for Manitoba.

It called for careful formulation of trade agreements "with any consuming country in the world," first consideration in such agreements to be their effect on opportunities to sell Canadian foodstuffs in the country with which negotiations are made.

It urged establishment of a Dominion organization whose function would be to develop a well-conceived and aggressive advertising policy and advertising campaign in countries which buy Canadian foodstuffs. It stressed importance of research in "exploring to the utmost limit" the possibilities of using an ever-increasing quantity of farm products for industrial purposes.

Mr. McKenzie, vice-president of United Grain Growers, was speaking on the interdependence of agriculture and industry. He said industry was really in partnership with the farmer in development of agriculture.

"Partnerships involve mutual interests, but they also involve mutual responsibilities," he said. "All must recognize agriculture for what it really is—the chief source of our material for industry and chief market for the products of the manufacturer."

He suggested there were "signs of unrest and dangerous thinking among our people which, if left unchecked, may prove disastrous."

"We dare not bury our heads in the sand and say these are passing phases and all will soon be well. Rather must we recognize that these dangerous tendencies can only be checked by giving new constructive leads to the thinking of our people that will win their confidence and inspire them with hope for better things to come."

Mr. McKenzie referred to agriculture as "Canada's No. 1 industry." He said, however, that in his opinion the days of expanding wheat acreage in western Canada were over.

In reference to efforts being made in various nations to increase agricultural production, Mr. McKenzie said:

"That is a challenge we can meet. It imposes upon us the necessity of studying the market requirements of the countries in which we propose to sell our goods and of shaping our production to meet that demand."

"And it means that we must forget some of the foolish ideas we had about controlling prices and be prepared to sell our goods at something close to world competitive price levels."

Mr. McKenzie said he thought it unfortunate "that we have had in Canada, and may still have, those who cling to the philosophy of controlled production and compulsory marketing."

### Large Sheet Of Glass

#### Ford Plant Produces 500-Mile Sheet 51 Inches Wide

Long enough to reach from Detroit to Gettysburg, Pa., a 500-mile ribbon of glass, 51 inches wide, has been produced in a record-breaking run at the Ford Motor Co. Rouge plant.

The sheet is the longest ever produced at the Ford plant, and company engineers said they believed it was the longest ever made anywhere. Molten glass at a temperature of 2,200 degrees flowed into the rollers continuously for 139 consecutive days in establishing the record run. The round-the-clock schedule was maintained as long as possible, it was explained, because glass making is a delicate business in which interruptions cause many complications.

More than 86 tons of glass flowed into the rollers each day of the run. Although the rollers are water cooled, the heat finally caused them to oxidize slightly, the glass began to stick and the run was ended.

The strip has been made into safety glass and split up for use as car windows and windshields.

Tobacconist: "It's no use suing you. Here's a receipt for what you owe. We'll call it paid."

Customer: "Splendid!"

Tobacconist: "Well, what are you waiting for?"

Customer: "Isn't it—er—usual to give a chap a cigar when he settles his account?"

Automobile plants in Czechoslovakia are operating at capacity.

### Towns And Villages

#### Not Doomed To Extinction As Some People Think

If you had read some of the doleful outpourings of the last few years you might have concluded that small towns in the rural areas were doomed to extinction. The inference was that there would eventually be nothing but great cities stuck in the middle of uninhabited wild lands.

Not so bad as that. The towns and villages are not doomed, and the rural areas are not going to revert soon to the conditions of a century ago.

Government figures bear out this statement. The smaller towns and villages are getting along better than you. In the year of 1936 and 1937 the business done in these towns and villages has not declined; on the contrary, it increased 125 per cent., says the bureau of foreign and domestic commerce.

These same statisticians assert that business in June this year in this class of commodities was the best for any June since 1929.

Such merchandise as radio, farm implements, textiles, refrigerators and paper all showed a better business, according to reports of larger corporations doing business with smaller towns and rural areas.

There are many compensations in living in a smaller town, for a family has more room, more freedom, and generally a better standard of home life than in crowded quarters in a great city. Such advantages will survive as long as ordinary business turnover in smaller communities continues to be satisfactory.—Bloomington, Ill., Pantagraph.

### Crime Laboratory

#### Mounted Police To Pursue The Scientific Detection Of Crime

Orders have been placed by the Royal Canadian Mounted Police for equipment for the new laboratory for the scientific detection of crime which has been established at Ottawa with a branch at Regina. Comparison microscopes used in connection with ballistics and most modern cameras are included in the \$10,000 order which has been placed.

Methods used by Scotland Yard and the French Surete were studied by Assistant Commissioner S. T. Wood when he was in England in charge of the police contingent which was so enthusiastically received by London crowds during the Coronation procession. Commissioner Wood, it is understood, brought back a great deal of useful information.

Appointment of Dr. Maurice Powers of Rockland to the staff of the crime laboratory is expected to be followed gradually with the naming of experts to the new branch.

The R.C.M.P. already has a central finger-print branch at Ottawa with upwards of 700,000 prints on file.

The services of specialists at the National Research Laboratories will also be used by the police when the necessity arises.

The R.C.M.P. also has charge of registration of revolvers and pistols in Canada. There are approximately 60,000 weapons registered. This is believed to be the peak.—Ottawa Journal.

### Health Insurance

#### Any Plan Should Be Centred Around Voluntary Hospitals

Any scheme of health insurance should be centred around existing voluntary hospitals, the Canadian hospital council was told during a discussion in which European systems were declared unsuitable for Canada.

Dr. J. H. Holbrook of Mountain sanatorium, Hamilton, Ont., told delegates it was his opinion hospitals should be made the centre of medical practice just as schools are the centre of educational practice.

Their clinical facilities and facilities for diagnosis should be made available to private physicians in any scheme of health insurance, he said, adding he was opposed to any system that would be dictatorial in nature.

Another problem solved is that of "when is a new potato new?" The potato marketing board in England ruled no matter when it appears above ground, a potato is not "new" after July 31.

Some amusement was caused when it was learned Edward Jones, fined at Bangor, Wales, for exceeding the speed limit, came from Hurry street, Liverpool.

### HUGE FLAG PROTECTS REFUGEES

When refugees were evacuated from Shanghai aboard this tender, bound for the liner President Jefferson, a huge American flag signalled its mission, but the boat was forced to run between the criss-cross fire of Japanese and Chinese batteries as it raced up the Whangpoo River. Mrs. Theodore Roosevelt, Jr., was one of those on board the tender.

### Yield Was Phenomenal

#### In 1936 Prairies Produced Largest Honey Crop On Record

The beekeeping season in Canada proved in 1936 to be one of the best on record. Not since 1931 has honey production reached such a high level as during the past season, and there have been only two years when the production was higher. The previous high crops were 29,549,000 pounds in 1930 and 29,666,000 pounds in 1931. Last year the honey crop amounted to 28,241,000 pounds as compared with 24,291,000 pounds in 1935. The increase last year, therefore, was 3,950,000 pounds or 16.3 per cent.

The outstanding feature of the season of 1936 was the phenomenal yield obtained in the prairie provinces. Favorable weather, extending well into September, lengthened the normal season considerably and resulted in bumper yields. Crops of 500 pounds per colony were not uncommon and the average for the province was more than double that of the previous year in Saskatchewan, while in Manitoba and Alberta it was greatly in excess of 1935. As a result of these conditions the prairie provinces produced the largest crop in their history. As compared with 1935 the total crop for Saskatchewan increased from 1,051,400 to 2,636,300 pounds; Manitoba from 5,018,700 to 8,135,500 pounds; and Alberta from 1,100,000 to 1,850,000 pounds. The average per hive rose in Saskatchewan from 74.7 to 155.1 pounds; in Manitoba from 97 to 158.6 pounds; and in Alberta from 84.2 to 152 pounds.

In 32 years, Thomas G. Weston of Calgary, drove more than 1,000,000 miles in automobiles without an accident. A newspaper published a story about his safe driving and then—he crashed into a street car.

### People Like To Sing

#### But Usually Enjoy It More In Large Groups

Interviewed on the subject of his success in getting movie theatre audiences to join in community singing, a well-known band leader said that he believes people like to sing in large groups. He thinks everyone has "a bit of the performer in him."

Any wife who has listened to the whistlings and warblings of her husband in the shower or at his shaving mirror of a morning will agree with this observation. Others who will find it sound are those who like to join in the hymn-singing at church.

Timid souls, who know their voices will never get them grand opera contracts, will try a tune when they are alone, or when their possible sour notes will go unheeded in a chorus of amateurs.

An army may travel on its stomach, but it also marches on its vocal chords. In that case community singing is a definite factor in keeping up morale. Right now, according to reports, new battle songs are being written in China.

Even in their native temples the Chinese are confidently singing of their "war of resistance", which is to protect their territorial integrity and their national existence.

The degree of music in the average soul may not be great. Yet there is real satisfaction in getting the music out of one's system, especially under cover of a crowd.—Detroit Free Press.

Probably those Arabs who changed their camels for autos thought "25 miles to the gallon" meant water, not gasoline.

American youngsters play about 50 different types of games in which marbles are used.

### Afghan is Blend of Choicest Scraps

PATTERN 5830

A heap of yarn scraps, a few spare hours, and the bloom of summer indoors for many winters to come! Crochet this flowered Afghan square by square—they're only 3½ inch squares and go quick as a whip. You'll have the flowers that bloom in the spring, in vivid and pastel shades, blossoming in all their glory against a background of woody leaves. Make a pillow to match, too. In pattern 5830 you will find directions for making the Afghan and a pillow; an illustration of it and of the stitches used; material requirements, and color suggestions.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

Make Flower Afghan a Square at a Time

## Canada's Progress Towards Rearmament Has Been Hastened By Authorities

### The Successful Farmer

#### To Be Real Agriculturist One Must Enjoy The Work

It is important that the men in agriculture should enjoy the business, Hon. Duncan Marshall, Ontario Minister of Agriculture, told the Agriculturists' Day luncheon at the C.N.E., Toronto.

"The people we want on the farm are the youth who realize the value and opportunity afforded by the land, who wish to till their land a little better than the neighbors around. Many of our failures in agriculture are due to the fact that the men in these instances did not belong there," he said.

There should be more attention paid to the selecting of boys to stay on the farm. In Great Britain, he said, a farmer decides which of his boys has brains enough to become a farmer. "The others will get along in business or one of the professions."

"The great thing about farming is the land and the condition of the land is a clear indication of the kind of agriculture we have. In Great Britain, men are devoted to the land. To say I've done my duty by the land, is the proudest boast an English farmer can make."

County agricultural societies and county councils have co-operated splendidly with the Department of Agriculture in killing weeds with chemicals, he continued. "The results are astonishing," he said. "In some counties there are practically no weeds."

Farming is not an exact science, and many theories are not so useful in actual practice, said Mr. Marshall with reference to education for agriculture. The best lesson farming youth can learn at schools and colleges was to realize their student days had only begun.

### Thatcher Wheat

#### Tests Of Rust-Resistant Wheat Show Favorable Results

Tests of Thatcher rust resistant wheat, conducted by the Dominion department of agriculture for milling qualities, have shown "favorable results," according to officials of the department. Thatcher variety wheat seed was imported on a considerable scale last year by Western Canadian grain companies and provincial governments so that 6,000,000 bushels were grown. Tests indicate it meets all requirements of the British milling trade.

Department experts, however, say there are two other varieties of rust resistant wheat developed in Canada equally good, and in some respects, possibly better than Thatcher. These are Renown and Apex. In considering rust-resistant wheat, many other qualities besides the ability of the variety to withstand rust must be taken into account—qualities such as milling, yield, straw, period of ripening, etc. Taking all these into consideration the experimental farm experts consider that both Renown and Apex stack up as well as Thatcher, possibly slightly better on aggregate points.

In any event, the Dominion and provincial governments and grain companies will have sufficient seed of these rust-resistant varieties for next year to sow the bulk of Manitoba wheat lands and the worst affected areas of Saskatchewan.

### Making Use Of Wood

#### Germany Turning It Into Power, Clothes And Food

Prof. Nelson C. Brown, of the New York State College of Forestry, Syracuse University, returned from Germany, expressing the conviction that wood has possibilities of becoming the most important single basic material for Germany and perhaps the world.

Professor Brown said he saw wood made into wood-gas to operate engines, wood-clothes for textiles, and food for humans and animals.

The professor said 6,000 vehicles have adopted the wood-gas and have their own refueling stations where wood is bought instead of gasoline.

Twenty-five per cent. of the Nazi youth, army and government uniforms are made from wood textiles, he said. These are of wood-silk, wood-cotton and wood-wool.

They are used to make self-sufficient a country that is importing at great expense wool from Australia.

Food substitutes from wood are adequate, but expensive, said Professor Brown. He found that candy of wood-derived sugar is tasty, but the commercial use of which is not likely because of the high cost.

Canada's progress towards rearmament has been hastened in the past few months, following return to the Dominion of those cabinet ministers who attended the imperial defence conference last May.

Canadian aircraft factories are working on the program which calls for acquisition by the Royal Canadian air force of 102 planes. Shipyards on the Atlantic and Pacific coasts are building four new mine sweepers. Additional coast defence batteries are being emplaced. More men are being added to both the Royal Canadian Navy and the Royal Canadian Air Force.

Last January Canada's estimates for the national defence program were boosted by approximately \$14,000,000 over those of the preceding year. Amounting to \$33,730,873, they have since been added to by supplementary votes; and their figure reached a height unknown since the Great War.

Prior to that Hon. Ian Mackenzie, minister of national defence, had completed reorganization of the non-permanent active militia, a force which corresponds to the British territorial and the United States National guard.

Previously the N.P.A.M. had been something of a Cinderella in the Canadian scheme of things, credited only with ceremonial parading and occasional weekends in camp. Cavalry, artillery and infantry, made up of regiments and batteries mostly without horses and guns, and large numbers of units shy in personnel outside of an officer cadre, formed the old militia.

Mr. Mackenzie, however, swept this away last December and gave Canada a new military set-up. He reduced 36 cavalry regiments to 20, of which he turned four into armored car units. A total of 135 regiments of infantry were whittled to 91. These were again split into 59 rifle battalions, 26 machine gun battalions and six tank battalions.

He increased the artillery by 41 field, six medium and five anti-aircraft batteries. At the same time the administrative services were reorganized.

Provision was made this year for the training of 46,000 men, giving them from 10 to 14 days in summer camps additional to the normal training in their local drill halls.

The permanent force, which corresponds to the regular army, has a strength of 465 officers and 3,760 other ranks. They are distributed among artillery, cavalry, infantry and administrative units. Some batteries of artillery have been completely mechanized, while a number of armored cars have been acquired for the infantry; but little real progress has so far been made in the way of providing either the permanent or non-permanent force with tanks or anti-aircraft equipment.

It is unlikely these will be manufactured in Canada; but defence authorities some time ago completed a survey of the possibilities of turning existing iron and steel plants to the making of guns and munitions.

Development in the air, additional to numerous flying fields which are dotted throughout the country, contemplate construction of 12 fighter planes; three army co-operation machines; seven flying boats; 24 bombers; 11 torpedo bombers; 18 coastal reconnaissance and 27 training planes. Progress is well underway with the increase of personnel to 195 officers and 1,498 airmen.

### New Arctic Post

#### Buildings At Fort Ross Constructed Within One Week

When the Hudson Bay Company ship Nascopie, carrying the government's eastern Arctic patrol, cleared from Fort Ross on Bellot Strait, three Hudson's Bay Company officials were left in charge of Fort Ross, the post being constructed within a week from materials landed from the Nascopie. An insulated house, heated by a coal-burning range, was built, a warehouse constructed for perishables and the men made as comfortable as possible.

Major D. H. McKeand, commander of the patrol, believes the construction of Fort Ross is "an outstanding achievement in Arctic administration." He is confident the post will provide good opportunities for scientific exploration. It is on the southeast shore of Somerset Island which is separated from Boothia peninsula, northern tip of the Canadian mainland, by Bellot Strait.

Fed one bushel of corn, a lean hog will gain 10 pounds in weight, crating 7 to 9 more pounds of marketable pork.

## ABBOTSFORD

Mr. and Mrs. Mike Sadler, recent arrivals from Stockholm, Sask., have taken up residence on the Duncan McDonald place of 10 acres on Ware road. They motored here from the prairie with a trailer.

Harry Conway, champion plowman came home from the Dewdney contest last week with the McKee Cup, emblematic of taking top place in the sod class, an open championship.

An Abbotsford truck driver was intercepted by police at Westminster bridge while transporting 100 sacks of untaxed potatoes into Vancouver. He is answering a police court summons this week.

Seven tables were played at the whist drive held in the Men's Club last Thursday evening. First prizes were won by Mrs. Paton and Mr. Switzer; consolations Miss Murray and Mr. Swalle.

Mrs. F. V. Evans, Walmsley farm, is selling some of her effects and returning to Fox Valley, Sask. for the winter. Her husband is C.P.R. station agent there, and plans to retire here in a couple of years when his pension starts. Mrs. Evans will return in the spring.

Mr. G. Kilgour of Vancouver visited Abbotsford friends yesterday. He was formerly employed at the Abbotsford lumber mill.

K. MacKay is home at his farm in Poplar from Seymour Narrows. With the 1936-37 Agassiz egg-laying contest now drawing to a close, being now in its fiftieth week, the pen of birds entered by F. C. Evans, Abbotsford poultry breeder, stands in fourth place.

Defeat for Aberhart If He Calls Election Now  
—JOSEPH GILMOUR

Abbotsford Village Commissioner

"The Aberhart Government will suffer overwhelming defeat if it goes to the country today in Alberta," Mr. Gilmour states upon his return a few days ago from Edmonton. "Social Credit may be strong yet in the prairie province, but the party has lost most of the friends it had a year ago."

Mr. and Mrs. Gilmour were shocked a day after arrival at the Albertan capital by death of Mr. Gilmour's brother, Alex, who is known to many friends in Abbotsford.

Mr. Gilmour told of attending a meeting of the Citizen's League in Edmonton armory, where 7,000 persons within the building, and 2,000 outside who could not gain admission, registered overwhelming disapproval of Aberhart measures. In a motor trip from Edmonton to Lloydminster, where they formerly lived, Mr. and Mrs. Gilmour entered into conversation with people residing in the rural communities en route, and they found the sentiment strongly antagonistic to Social Credit, which everyone agreed was doing Alberta inestimable harm. "An election now would sweep the Aberhart government absolutely out of office," Mr. Gilmour said.

## Protect White Farmer

A Vancouver Island farmer asks why the government, if it wishes to be fair in its labor laws, does not extend "protection" to white farmers against the very unfair competition of the Oriental lower standard of living. Restrictions for Orientals in agriculture is the British policy in force in Africa, Australia, and New Zealand. Why should it not be in force in B.C.? he asks.

## LIBRARY NOTES

### THE LIBRARY TAX

Although the library tax is a question of wide interest in the valley, it is one on which very many taxpayers are still not at all clear, and a brief explanation should therefore be of some interest.

In the first place the library board does not itself set the specific tax rates as levied in the respective municipalities and rural school districts constituting the union library district. The board simply decided the total amount to be raised in the library district as a whole, and also the basis on which this total is apportioned to the various municipalities and districts. The basis which has actually been used from the very first is to apportion quotas in strict proportion to respective populations. The total annual amount has been an amount equal to 35c per capita of the total population (man, woman and child).

The next step in the process is the actual levying of the various tax rates or otherwise providing for payment of the apportioned quotas by the municipalities. The total population of Surrey Municipality, for example, is 8,521. Its annual tax quotas is therefore \$2,982.35 (35c on each "unit" of the Surrey population, from the age of one day to one hundred years.) The total quotas must be provided by those upon whom the municipal council has authority to levy taxes. There are several ways in which this may be done: (1) by payment out of general revenue, (2) by levying a flat rate on landowners only (3) by a flat rate on both landowners and adult non-landowners who have resided in the municipality sixty days.

Preference among municipal councils, as shown by the methods in use in 1936, is evenly divided between these three. Four municipalities paid their quotas out of general revenue, four levied flat rate on landowners only and five levied on both landowners and residents. Rates varied from 50c to \$1.50 per year, according to nature of property distribution and to method adopted. Where the specific tax has proved insufficient to raise the individual municipal quota, the balance has, of course, been paid out of general revenue, which simply means that to that extent the method has been a cross between the direct levy and the method of payment from general revenue as definitively chosen by four of the municipalities of the valley.

No new direct tax is ever popular, however small—in this case the cost of a couple of shows or a few gallons of gasoline. Results, however, in the second year of the new library administration were on the whole very

satisfactory, such reports as the following having been received from municipal officials: "Usual few objectors, but on the whole, the tax has been collected without any difficulty"; "During the first year there were quite a number of objectors against the tax, but all difficulties in this respect have now disappeared".

The rural school districts have now the same options as to methods of taxation to be used, whether on an assessment basis or by a flat rate on property-owners or on both property-

## GIFFORD

Miss Winnie Nicholson left on Saturday for Powell River, where she expects to spend the next few months.

A public meeting under the auspices of the C. C. F. will be held on Thursday evening in the Glenmore school.

Speakers will be Grant McNeil of North Vancouver, and the Chilliwack Riding Candidate, T. Luxton.

Mr. W. Wilson, who has been the quest of his parents Mr. and Mrs. J. Wilson the past two weeks has returned to Powell River.

Mrs. Martha Westlin has returned from Kamloops where she spent the past week.

## Sequel To "Mutiny on the Bounty"

Since the year 1923, when he graduated from Harvard magna cum laude and paid his first visit to Pitcairn Island, Dr. Harry Lionel Shapiro has spent much of his time studying the 200-odd descendants of Fletcher Christian, his five Bounty mutineer friends, and their numerous Tahitian wives. The lank, sinewy-smoking anthropologist made a second trip in 1934, and he is planning a third.

To facts already related in his book "The Heritage of the Bounty," he added others last week in his paper which covered results of mixing two radically different racial strains. Hybrid plants are usually bigger and stronger than either stock that went to make them. Dr. Shapiro believes the same holds true to human beings. Pitcairn Islanders at one time were nearly two inches taller than their British and Island forebears; today shrinkage processes have set in, and they are a bare inch taller.

Likewise their originally enormous fertility has dropped to a level approximating averages elsewhere in the world. In the second and third decades of last century Pitcairn women averaged 11.4 children each, now 2.4.

"This...leads to the conclusion that the rate of population increase has declined....The decline in physiological vigor is the result of inbreeding and the exhaustion of the forces of hybrid vigor."

## TO THE VOTERS OF CHILLIWACK RIDING

DEAR ELECTOR:

Chilliwack, B.C., May 18, 1937

This letter is to try and acquaint you with Leslie H. Eyres, your candidate in this election. We would like, as far as a short letter to you is possible, to let you know him as we who see him every day know him.

In this election we are seeking the best men the community can provide. We are fortunate indeed in procuring Leslie H. Eyres, more familiarly known as "Les," as your candidate.

Les Eyres is a comparatively young man, of sound but progressive ideas, and with a record of achievement.

Like so many of our successful young men, his roots spring from the soil. Homesteading in Saskatchewan in the early years of the century, he knows the struggle of wresting a living from the soil.

He is a returned man with an enviable war record, terminating as a prisoner of war. He is a successful business man of Chilliwack, where he has made a name for courtesy and honesty.

He is a successful public man—elected in 1928 to the Chilliwack city council by the largest vote ever polled by an aldermanic candidate in Chilliwack. Re-elected in each succeeding election by large majorities, he is regarded as a tried and tested man.

He is a public-spirited citizen. Besides his business and civic duties, he has made opportunity to serve through his work in the Community Chest, the cause of the unfortunate.

Pictured above in the harbor of Brest, France, is the Spanish loyalist submarine C-2, left stranded by its crew which divided into Red and anti-Red groups. A rebel plot to seize the submersible failed and the boat is now awaiting a new crew to take it back to Valencia, Spain.

Everett C. Stiles from Bellingham has joined Sumas immigration staff, replacing Inspector Wolstenholme, who goes to Victoria.

**Japanese May Make  
B.C. Another Belgium**

—B. McKELVIE

"United States and Japan will eventually come to war, and that war will be fought in Alaska," says Bruce McKelvie, Victoria Colonist editor. "The republic to the south will never again send her forces abroad. The United States will be on the defensive and Alaska will be the battleground."

This well-known newspaperman also maintains Japan now controls three strategic points in British Columbia: "Cowichan Lake, where Japanese interests control \$600,000,000 feet of standing timber, an ideal place for a plane base to bomb the interior of British Columbia; Alert Bay, where Japanese interests control forty-five square miles of timber; and the Queen Charlotte Islands, which dominate Prince Rupert from a military standpoint."

Mr. McKelvie gave his observations in the course of an address in Victoria, when he spoke on the proposed Alaska-Yukon highway.

The speaker mentioned Premier Pattullo's trip to Washington to discuss the Alaska-Pacific project, stating "We will probably be offered the money without interest to build the roadway, but are we going to allow the Government of this province to sell us out to a foreign country? That is a matter we have to decide, and do it quickly."

**Alaska Highway Is Military Project**

"There can be no doubt the main purpose of the proposed construction of the Alaska-Pacific highway is to give the United States a military line of communication with Alaska in the event of war, states Mr. McKelvie.

The speaker pointed out the possibility of the three Japanese-controlled points being used for military purposes in case Japan went to war with the United States. He also claimed there were large numbers of Japanese fishing boats that could be converted into war vessels for mining channels and passages on the British Columbia coast.

"These Japanese fishermen have a more intimate knowledge of our waters than our own Admiralty," he said. "So you will see that the line to Alaska is very slender indeed. United States wants a second lifeline and that must be through British Columbia, and that is why we should be particularly careful about the annexation of the Yukon. Ottawa could not very well allow a road to proceed through a Federal-owned property, but if it was owned by the Province, it would be a different matter. There is a very great danger of absorption of the Yukon making British Columbia the Belgium of the Pacific."

### Synopsis of Land Act

**PRE-EMPTIONS**  
VACANT, unreserved, surveyed Crown lands may be pre-empted by British subjects over 18 years of age, and by aliens on declaring intention to become British subjects, conditional upon residence, occupation and improvement.  
Full information concerning pre-emption is given in Bulletin No. 1, Land Series, "How to Pre-empt Land," copies of which can be obtained free of charge by addressing the Department of Lands, Victoria, B.C., Bureau of Provincial Information, Victoria, or any Government Agent.  
Records will be granted covering only land suitable for agricultural purposes within reasonable distance of road, school and marketing facilities and which is not timberland, i.e., carrying over 5,000 board feet per acre east of the Coast Range and 8,000 feet per acre west of that Range.  
Applications for pre-emption are to be addressed to the Land Commissioner of the Land Recording Division in which the land applied for is situated, on printed forms obtained from the Commissioner.  
Pre-emption must be occupied for five years and improvements made to value of \$10 per acre, including clearing and cultivating at least five acres, before a Crown Grant can be received.  
Pre-emption carrying part time conditions of occupation are also granted.

**PURCHASE OR LEASE**  
Applications are received for purchase of vacant and unreserved Crown lands, not being timberland, for agricultural purposes. Minimum price of first-class (arable) land is \$6 per acre and second-class (grazing) land, \$2.50 per acre. Further information is given in Bulletin No. 18, Land Series, "Purchase and Lease of Crown Lands."

As a partial relief measure, reverted lands may be acquired by purchase in ten equal instalments, with the first payment suspended for two years, provided taxes are paid when due and improvements are made during the first two years of not less than 10% of the appraised value.  
MILL, factory or industrial sites on timber land, not exceeding 40 acres, may be purchased or leased, the conditions including payment of stumpage.  
Unsurveyed areas, not exceeding 30 acres, may be leased as homesteads, conditional upon a dwelling being erected in the first year, title being obtained after residence and improvement conditions are fulfilled and land has been surveyed.

For grazing and industrial purposes areas not exceeding 640 acres may be leased by one person or a company.

Under the Grazing Act the Province is divided into grazing districts and the range administered under grazing regulations amended from time to time to meet varying conditions. Annual grazing permits are issued based on certain monthly fee privileges is given to resident stock owners. Stock-owners may form associations for range management. Partially free permits available for settlers, campers and travellers, up to ten head.

## ANNOUNCING A NEW SERIES OF B.C. ELECTRIC FARM RADIO TALKS

Commencing Tuesday, October 26, our regular Farm Radio Talks will be on the air.

Tuesdays at 12.30 p.m. a 15-minute talk will be given, featuring outstanding speakers on agricultural problems.

Farm Market Reports, reviewing market quotations and trends, will be broadcast daily except Tuesday at 12.40 p.m. You are invited to tune in each day.

#### Purchase Huntingdon Landmark

Chas. Croke of Huntingdon this week purchased from J. M. MacInnis the "White House" situated near the international border, and something of a landmark to visiting Americans in prohibition days. The building, which was put up in 1921 by J. M. MacInnis and E. S. Plaxton, will be used as a dwelling by Mr. and Mrs. Croke, who have lived in the Huntingdon district intermittently for 25 years.

The funeral was held on Saturday at Hazelwood cemetery of two-year-old Shirley McKenzie, daughter of Mr. and Mrs. A. A. McKenzie, of Half Moon Bay, who was drowned last Wednesday. The little girl, who is a grand-daughter of Mr. and Mrs. R. S. Adams, Ridgedale, slipped off a rock near her home at Half Moon Bay, while playing alone. The body was found in several feet of water.

#### MRS. E. G. MacDONALD

A former resident of this district, Mrs. Edna Gertrude MacDonald, passed away in Vancouver on Wednesday last. Interment took place in Forest Lawn Memorial Park on Friday.

Deceased lived with her husband, Norman MacDonald, and family, on the Mt. Lehman road for nine years, moving into Vancouver recently.

Mrs. MacDonald, who was forty-one years of age, and a native of Oregon, is survived by her husband, three daughters, Mrs. B. Cook, Joanne and Norma; also her mother, Mrs. H. Bennett, all of Vancouver.

### Can the White Grower Survive?

"There are 57,139 Chinese and Japanese in B.C.—27,139 Chinese, 30,000 Japanese, according to the latest available census figures.

This, out of a total population, according to the same census, of 694,000 people, does not seem to be a great number of Chinese and Japanese.

Yet this comparatively handful of people is taking a great portion of business from white producers, wholesalers and retailers of the lower mainland.

Ask your grocer if 7,139 Chinese is a small number. Ask your wholesaler. Ask your grocer, your florist. Ask them if the number of Chinese is "unimportant." The answer is apt to be blisteringly emphatic.

It would be grossly unfair to object to Chinese or Japanese earning a decent living in British Columbia. It would be unjust and hardly in the traditions of our Empire to begrudge these peoples a chance to work and prosper solely on the grounds of race.

Yet, Producers-Consumer emphatically wishes to state that the menace of these peoples cannot be over-estimated in British Columbia. We say it advisedly, and in saying it take full cognizance of the fact that scores and hundreds of Chinese and Japanese are endeavoring in every way to become useful citizens of their adopted country. We say it with no thought of objection to these races on the grounds of color or on the grounds of prejudice.

If Chinese and Japanese are succeeding here while white growers cannot succeed, then they are to be congratulated upon their success and commended on their ability. If they are succeeding at our own game, in our own country, and playing according to our rules, then well and good.

If, on the other hand, they are succeeding because they have developed clever ways of avoiding those rules; if they are succeeding because they are playing the game according to their own rules, or lack of them; if they are breaking laws which force white growers, wholesalers, and retailers to fight an uneven battle, then correction, not congratulation, is needed.

Readers of Producer-Consumer should ask themselves these questions:

Are minimum wage and hours of work laws obeyed equally by all sections of B. C. residents?  
Are the dictates of the Sales and Consignments Act obeyed?  
Are sanitation and housing laws obeyed?  
Are taxes fairly assessed and fairly paid?

Mr. and Mrs. Martin and family have taken up residence on the farm formerly owned by Mrs. W. Scott.

Rev. and Mrs. Donaldson and Jean have returned from Ladner, where they visited Mrs. Donaldson's parents, Mr. and Mrs. McDiarmid.

Miss Dorothy Case spent some time in Vancouver as the guest of Mrs. Scott.

The meeting of the Hospital Auxiliary was held recently at the home of Miss C. Cruickshank.

Miss Doris McCulloch spent the week-end in Vancouver visiting with her sister, Miss Jean McCulloch, R.N.

Mrs. Pettigrew visited her father, Mr. F. White, St. Nicholas, last week. She was accompanied by Miss Jo Turney, Vancouver artist.

Guests of Mr. and Mrs. T. Kirkpatrick at the week-end were their son-in-law and daughter, Mr. and Mrs. Walter Dick of Bellingham.

Mr. and Mrs. G. Gay of Vancouver spent the week-end with the latter's parents, Mr. and Mrs. W. Healey.

Mrs. J. A. Mason is visiting for a time with Mr. and Mrs. W. Chisholm at Sardis.

## Prairie Mennonites Grateful to C.P.R.

At a gathering in Coaldale, Alberta recently, almost a thousand Mennonites, farmers, their women-folk and families presented bouquets and expression of gratitude to Sir Edward Beatty, and as a result of the intervention of the railway company they were brought to Canada and settled on lands in Alberta and Saskatchewan.

Bishop Teows, spiritual head of the Mennonite people of Western Canada, in an eloquent address, told of the sufferings of the Mennonites in Russia, the loss of their homes and all their possessions, and their deliverance through the help of the Canadian people and the Canadian Pacific. They had, he said, left Russia followed by a curse. They had been welcomed in Canada, according to the Gospel of St. John, and here they had found freedom, liberty and an opportunity to carve out new homes for themselves.

## Manitoba to Try New Apprenticeship Law

Manitoba is to try out a new apprenticeship plan. It is designed to cover the retail and wholesale trade, exclusive of departmental stores and mail order houses. Briefly, the plan will permit retailers and wholesalers to employ youths over 18 years of age at less than minimum wages, providing they agree to compensate the young persons with additional training. The new regulations were issued by the Minimum Wage Board, and became effective September 15.

A prominent retailer discussing the plan stated: "I have two delivery boys in my store. These boys are slowly learning the business on the side and, given time and assistance, would eventually become experienced clerks. Under the old system, when they reached the age of 18 years, I would have to pay them the minimum wages for clerks while they continued to be delivery boys. Frankly, I can't afford such philanthropy in this world of competition. However much I might regret it, I would be forced to let these boys go, and take on in their stead two delivery boys under 18 years of age."

He went to explain why both the boy and the merchant were injured under such circumstances. The merchant because he has invested some hundreds of dollars in the partial business education of the boy; and the benefits of that education and expense would accordingly be lost to him. The boy because he leaves his job at a time when he can convince nobody that he is an experienced man. He is not yet a clerk, but certainly no longer just a delivery boy. Out of a job, he swiftly forgets the little he has learned, and in addition suffers a morale collapse that soon renders him unfit for any kind of job.—Hardware & Metal, Toronto.

## ABBOTSFORD

R. A. Burgess, government inspector of dairy products, Vancouver, made calls in Abbotsford last week, and left copies of Dairy Act regulations with local storekeepers.

Mr. and Mrs. W. Stewart and daughter Phyllis of Luceland, Sask., are spending the winter at the coast, with their daughters Florence and Charlotte in Abbotsford and Vivian in Vancouver.

Joe Olsen, Tommy York and Pete Martin returned Sunday from a two-week hunting trip in the Cariboo. They brought back a moose, shot by Mr. York and a sackful of grouse and ducks.

Dr. Llewellyn Douglas, who operated a dental office in Abbotsford several years ago, visited friends in the district last week.

Effie Roberts is singing over radio station CHWK (780 keys) tomorrow (Thursday) at 5.30 p.m.

Cribbage games played this week resulted as follows: Wednesday Abbotsford Men's "A", 19, Abbotsford Men's "B", 17; Monday, Abbotsford Ladies' "A", 18, Huntingdon 18. Teams having already started in the league are Abbotsford Ladies' "A" and "B" teams; Abbotsford Men's "A" and "B" teams and Huntingdon; Poplar have tentatively entered but have not yet played any games.

## IN MEMORIAM

IN LOVING MEMORY of Floyd Myhre, who passed away October 17, 1936, aged 28 years:

He went away without farewell,  
He said goodbye to none  
But Heaven's gate was open wide  
And a loving voice said "Come".  
Beside his grave we often stand  
Our hearts are tired and sore  
But through the gloom  
There comes these words:  
"Not dead, but gone before".  
Inserted by his father and brothers.

## MRS. C. GEPHART

Death occurred in the M.-S.-A. hospital on September 10 of Mrs. Camilla Gephart, aged 71, wife of Charles Gephart, old-time resident of Peardonville. The body was sent to Chase, B.C., for interment in the family plot.

Mrs. Gephart was a native of the United States, and had lived here for about 17 years. Relatives and children of a former marriage, reside at Chase, B.C.

## WORLD HAPPENINGS BRIEFLY TOLD

Scotland Yard announced the ban on political marches in the East End of London has been extended three months.

Benches in Berlin parks reserved for the use of Jews will be painted yellow, authorities in the western section of the city, where most of the Jews lived, announced.

A new type of undersea mine capable of protecting ports effectively in time of war has been perfected by the admiralty, the London Sunday Referee said.

Egypt's new ruler, King Farouk, will be crowned Feb. 11, 1938—his 18th birthday under the occidental calendar. The young king was invested as ruler on July 29—his 18th birthday under the Moslem calendar.

While Halifax police delved into bigger crimes, somebody walked up to the station and lifted from its hinges a 300-pound gate connecting city hall and the police garage, and made good his escape.

One hundred and five bushels of oats to the acre is the record harvest of N. P. Tracy, a Lethbridge district grower. He threshed a 14-acre field of oats. The total yield was 1,470 bushels.

Traffic fatalities among Detroit children have been cut 75 per cent. In recent years by the school safety patrols, 6,500 boys who protect 2,500 city crossings for an aggregate of 12,000 hours each day.

It is not often that a storm interferes with soccer, but a recent English league fixture between Walsall and Mansfield Town was abandoned when heavy clouds made visibility almost nil.

The Aga Khan, famous sportsman and delegate from India, was elected unanimously as president of the League of Nations assembly. The prince is head of a sect of Moslems in India.

## More Population

Says Canada Needs More People To Fulfill Destiny

Two prominent Canadians—one a senator and the other director of colonization and agriculture for Canadian National Railways—told the Canadian Chamber of Commerce convention at Vancouver that Canada's principal need was more population.

Senator J. W. deB. Farris of Vancouver, said "our machinery, our boilers and our engines are too big for the steam we are able to generate." He said Canadians had laid the foundations and erected a superstructure for three or more times the present population.

The same thought was expressed by Dr. W. J. Black of Montreal, who called for "constructive leadership" of the immigration problem because Canada needed more people "if we are to fulfill in any degree the destiny that nature intended for us."

"We have in abundance great public institutions . . . for a population three times the size we have," he said. "Our railroads have been extended in all directions at the request of the people, and are obliged to serve territory in places which return them limited revenue because insufficient people are there."

Dr. Black suggested Great Britain, the United States, Scandinavia, Switzerland, Czechoslovakia, Belgium, Holland and the Ukraine could provide Canada with the type of "good farming families" she needed.

## A Family Of Professors

It is pointed out in the obituary notices of the late Sir David Mason, of Melbourne, that he was not only a Professor himself (Chemistry), but that he was the son of a Professor and a Professor's daughter, the father of a Professor, the father-in-law of two Professors, the brother-in-law of a Professor, and the cousin of a Professor. On the occasions of family parties were there always chairs enough to go round?—London Observer.

## A Peculiar Accident

Static electricity generated on a dog's back was blamed for 8-year-old Teddy Fogel's badly burned right hand. John Questa, assistant fire chief, in Reno, Nevada, said the boy was petting the dog which was tied to the back of an automobile. The cap on the car's gasoline tank had been removed. There was a flash of flame and an explosion.

## War Will Affect Prices

Higher prices if the Chinese war lasts can be expected for the following articles: silk, tungsten, tea, hides and skins, bristles for hair brushes, carpet wool, tung oil, tallow, wax, tin, antimony. China produces two-thirds of the world's tungsten used in making tool steel and electric light bulbs.

## Cannot Do The Impossible

Britain Unable To Protect Both The Mediterranean And Shanghai

A glance at the map of China reveals that Shanghai is a sort of natural phenomenon. It was bound to grow up the moment the outside world began trading with the interior of China. The mighty Yangtze is the chief artery of such trade, and Shanghai is planted squarely at the strategic point to control such trade. It is a kind of "free port" where foreign goods can be warehoused and Chinese products brought down to exchange for these imported wares. There will always be a Shanghai. But if the Japanese can convince Europe and America that their tenure at this point is much too insecure for profitable investment in permanent establishments, it might come to be a Japanese Shanghai. This would give Japan a far firmer grip on China than would even a Japanese Peiping.

But the cooling thought should always be kept in mind that the British Empire cannot do the impossible. Britain may not like to lose Shanghai. She may not like to see her fabulously rich Chinese trade snatched away from her. She may be uneasy at the loss of prestige in Asia which this whole business is bound to cause.

But she has other more pressing responsibilities nearer home. It would be insane for her to waste her strength and fritter away her incomplete new armaments in a conflict in distant Asia while the Mediterranean lies under a constant and growing menace and the peace of Europe may soon be shattered when the time is ripe. She can wait at Singapore for any new developments in the China Sea, and she can protect India by keeping the lifeline open from Gibraltar to Aden. The British Knights of the Table Round, questing all over the world for wrongs to right, have gone out of business long ago. — Montreal Star.

## Prefer Northern Route

Trans-Atlantic Air Promoters Believe It Is The Best

Canada's trans-Atlantic air promoters are adhering closely to the Ireland-Newfoundland route and they have little confidence either in the South Atlantic or the North Pole route favored by the Russians, and which has apparently resulted in another tragedy.

Because of this firm faith in the North Atlantic route, which is evidently shared by the British interests, and which has won co-operation from the United States, it is believed that experimental flights by Imperial Airways across the North Atlantic which have been conducted during the summer will be continued in the coming winter.

There will be no transfer to the South Atlantic route via the Azores and Bermuda, as had been expected. There is no clear indication to what extent Pan American Airways will co-operate in winter exploration of the North Atlantic route, but Canadian experts are persuaded that the Ireland-Newfoundland route is commercially practicable even in winter. They assert the southern route is too slow, its longest hop consuming as much time as the entire trans-Atlantic crossing by the northern route.

## Health Insurance

Governments Should Go Ahead With Plan Only On Advice Of Medical Profession

Governments should go ahead with state-sponsored health insurance only after they have taken the advice of the medical profession as a body, Dr. T. H. Leggett of Ottawa, president of the Canadian Medical Association, said.

Speaking before the 45th annual convention of the British Columbia Medical Association, the Ottawa physician said the scientific side of medicine and surgery "has made such tremendous strides in the last few years that it has left behind the economic side."

"Medical men are unable to distribute benefits of medicine, surgery to the poorer man," he declared.

This, he said, had given rise to talk of government-sponsored health insurance but such a step should be taken only after the governments have taken the advice of the medical profession.

The day must come, Dr. Leggett declared, when federation of doctors throughout Canada will become a reality. It is needed, he said, to give united advice to any government on the question of health insurance.

Beavers do not eat fish although they spend most of their lives in water. They are strictly vegetarians.

X-ray motion pictures are being made in Berlin.

## TOTS ADORE A BRIGHT JUMPER FROCK FOR SCHOOL OR PLAY

By Anne Adams

Come Autumn with its crisp days, and every clothes-loving tot will crave such a fetching jumper frock as Pattern 4493 to see her through school and everyday wear! Stitched up in bright wool or cotton plaid, tweed, or challis, the jumper looks ever so smart worn with several dainty blouse versions in contrasting cotton or linen. Too, every kiddie will adore the smartly buttoned front, puffed-up sleeves, and classic Peter Pan collar. Mother will be delighted with the ease with which this simple frock can be cut, stitched, and finished up—even by an inexperienced seamstress! Send for your pattern to-day!

Pattern 4493 is available in children's sizes 2, 4, 6, 8 and 10. Size 6 jumper takes 1½ yards 36 inch; blouse 1¼ yards contrasting. Illustrated step-by-step sewing instructions included.

Send twenty cents (20c) in coin or stamps (coin preferred) for this Anne Adams pattern. Write plainly Size, Name, Address and Style Number, and send order to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

There are more than 6,000 kinds of hibiscus in Hawaii—all developed from three original varieties.

## The Family Doctor

Old-Time Family Physician Has Not Disappeared, Says Speaker

Prevalent belief the "old-time family doctor" has disappeared from modern practice is "rather amusing," Dr. J. S. McEachern of Calgary said in an address at the closing session of the annual convention of the Alberta branch, Canadian Medical Association.

Individuals who express such beliefs are showing "abysmal ignorance," and probably are thinking of a bewhiskered individual who makes his calls from house to house in a two-wheeled gig, Dr. McEachern stated.

The speaker, chairman of the provincial cancer committee, emphasized importance of co-operation from the "family doctor" in stamping out the dread disease.

Work of education which the cancer committee was attempting to further could be helped immensely by co-operation of staffs in hospitals if they would appoint committees to study case histories, and by the efforts of the "family doctor" in allaying fears of patients and explaining cancer symptoms in the community, Dr. McEachern said.

## Air Conditioning

Has Now Developed Rapidly Along Industrial Lines

Air conditioning, although first approached from the standpoint of achieving personal comfort, has developed rapidly along industrial lines as well, and it now plays an important part in many industries where temperature and humidity affect the products. This is especially true in the textile and food fields, where already notable results have been reported.

The prospects are that the next five years will see rapid advances taking place in the utilization of this process, and it is not unlikely that its general effect upon industrial conditions and modes of living will be as striking as that resulting from the development of the telephone, the motorcar and the radio.—Saint John Telegraph-Journal.

## Had Opposite Effect

It is said that the first missionaries who went to Alaska and tried to frighten the Eskimoes by sermons on hell, found that their sermons had the opposite effect. The Eskimoes told the missionaries that they were glad there would be a place for them in the hereafter where they could keep warm, and not be obliged to labor hauling wood.

## WHY NOT DO IT NOW?

By EBER BRADLEY (The Brandon Bard)

I like to read about Jack Miner  
As each author sings his song;  
But Jack is getting older now  
And can't stay with us long.

I, too, have packed that deadly gun,  
As Jack did in days of yore;  
But I got "Kingsville religion"  
And don't do it any more.

We love to sing of good old Miner  
And the birds about his home;  
But the lesson that he taught us—  
Have you got that through your dome?

Do you still pack that old shotgun,  
And spin your hunting lies?  
Are you still a brainless game hog,  
Shooting everything that flies?

And what about that boy of yours,  
With that dangerous twenty-two?  
Have you taught him game protection,  
As each father ought to do?

Jack Miner had to make that pond  
For those wild geese and ducks;  
And it cost him days of labor  
And several hundred "bucks".

Yet, we have hundreds of Canadians  
Who own a pond or farm,  
Where they could prevent all shooting  
And protect our game from harm.

So, you who read this rhyme of mine,  
If you own a farm or pond,  
In honor of Jack, make it a game preserve,  
Ere he heads for the great beyond.

## "UNCLE" JACK MINER BANDING MOURNING DOVES

Jack Miner, the Canadian naturalist, says: "The hope for the betterment of this world is more love, the right kind of education, and less bayonet point compulsion." He says "If you can get a child to build a bird house that child at once becomes a conservationist, because he will not only protect the birds himself, but will not allow others to harm or destroy them." Photo shows "Uncle" Jack with a group of underprivileged children, who were taken to his home and bird sanctuary for a picnic by members of the Kingsville Lions' Club. The children are banding young mourning doves to study migration routes.

## THE CANADIAN ADVENTURE TRIP OF BOB SIM, AN ONTARIO FARM BOY

No. 14 of a Series of 16 Letters

Bob compares Eastern Canada with the West—Enjoys his visit to Vancouver and Victoria, then into the United States and a dash for home. Discovers there is no Canadian Race—there is a Nationality.

On board S.S. Quilcene between British Columbia and Washington State. (Special Despatch by Bob Sim).—Sometime, somewhere this afternoon on board the Quilcene we crossed the International boundary line at a point many miles below the 49th parallel. At the moment of the crossing our Trans-Canada trip comes officially to a close. The rest is anti-climax, a three-thousand mile dash across our sister nation back to Ontario. At the Immigration Office we had to give our race. I said Canadian. There is no such thing as a Canadian race, I was told, there is a Canadian nationality, but no race. What extraction are your parents, I was asked. I said Irish and Scotch, so he wrote down English. Neither point was worth an argument, the latter possibly did violence to the rest of my ancestors. The former recognition of a Canadian race, is a problem to which my generation must soon address itself.

Since last week we have covered less than one hundred miles. We spent eight days in Vancouver with our little tent on the Spanish Banks for headquarters. We finally sailed from there to Vancouver Island with Floradora, and all our possessions. Landing at Nanaimo we drove leisurely southward to Canada's westernmost provincial capital, Victoria. Today we left Victoria and Canada, our next letter will come from Holstein, while it will take something less than a fortnight's furious driving for us to pilot Flora the Ford back to the home garage. This letter, posted by air mail at Seattle tonight, will arrive in Toronto within fifteen hours, at a cost of six cents. Prior to 1885 there was no railway to our coast, and the journey we can make nonchalantly in fifteen hours to-day was a feat accomplished by none but the most hardy.

In a decade Canada, the great sprawling waste of land and water, will have been drawn by air service into an area smaller than England of 1885 if calculated in travel-hours. What this will mean to the realization of Canadian unity no one can say.

## A Right Little, Tight Little Island

A Canadian may step off his country to the right at Cape Breton, to the left on Vancouver Island in order to contemplate the Dominion objectively. Writing from Baddeck, Cape Breton, about eight weeks ago, you recall my description of that island, its insularity, its feeling of aloofness from us poor land-locked Canadians. Vancouver Island has the same aloofness, the same insularity; it too has lumber, minerals, fish; rather than Cape Breton Gaelic you find here a peculiar type of Englishman. The type who leaves home to escape income tax, and British weather, he comes here to spend as little as possible, to live as long as possible, but ultimately to die. It is, a young man told me, an Englishman's graveyard. Victoria, he said, has the highest death rate in the world. Which you may believe if you wish.

Taken as a whole the island is different. Rich in natural resources, rich mines, fertile soil, giant trees, waters teeming with fish. Most of its goods are exported; it imports most of its foodstuffs, with the exception of truck. Its streets are narrow, the English accent is predominant, the people are settled with no desire for change. One youth said he had never been off the island, and never hoped to be. The world's best little island. What a contrast to the Mainland of British Columbia and the Prairies! There the streets are wide; non Anglo-Saxons predominate, fifty per cent. in Manitoba; the people are not deeply rooted, they will move in a day if something better shows up. As we saw at Saskatchewan, where the people are being so tragically expatriated.

But do not mistake the island for some dreamy Valhalla peopled by deceased Englishmen. We went inland to see the logging operations where giant trees are felled and carried to the sea in trucks carrying over 100 feet long. We rode into seeming impenetrable jungles on 100 horsepower caterpillars to drag the logs out to the open. At the sea the logs were loaded on ships bound for New Zealand and Japan.

## Here The Twain Shall Meet

Kipling was wrong, the East and West must meet, they are meeting. The British Columbia coast stirs a man's soul. Land of opportunity, gateway to the Farther West. Here the ships of two score nations ply our waters. We have a market in the millions of the Orient. Here is a future for Canada: to develop trade in Asia, to cultivate friendship among potential enemies.

In Vancouver there is a great Oriental population, Chinese and Japanese. They have their own daily papers, churches, fraternal societies. On occasions when their native lands were at war there has been trouble. Finally their leaders met and decided to live agreeably together in Canada. It is the genius of Canada to find a place for every race within it. First with the Indians, then the French, then with the Continental Europeans. Now the Oriental.

We attended a Japanese Coronation celebration in Vancouver. In their native costumes, they danced and sang as did their fathers in Japan. But it was a demonstration of loyalty to Canada, their chosen country.

Yet we refuse these industrious

and loyal races a vote. Unless we place a trust in them, how can we exact a full measure of loyalty in return.

Among Those Not Mentioned  
The difficulty in writing these letters is not to find material to write about, but to decide what to leave out. So we must leave unmentioned the fishing fleet, the canning factory, our fish dinners, that bowl of clam chowder, an enjoyable day at the Prince of Wales Fairbridge Farm School where British children are brought from the slums to be trained for Canadian farm life, and I haven't a line for salt water bathing, or mountain climbing, or how we washed Manitoba mud off Flora. Flora being the Ford, it was her first bath, and she looked beautiful. My next letter will be written from Holstein, but it may not appear in the next issue. Between then and now we are citizens of Canada, without race, in transit in the United States of America.

## Built In Regular Docks

New Flying Boats Larger Than Ships Columbus Used

Larger than sailing ships which Columbus used for his voyage to America in 1492, the six flying boats under construction for trans-Atlantic service will accommodate 50 persons each on a 24-hour schedule between the United States and Europe, Pan American Airways' officials said in describing plans for the new equipment.

Two thousand aircraftmen, scattered through 20 divisions of the Boeing Aircraft Company's Seattle plant, are moving rapidly toward completion of the fleet, which will be placed in use following preliminary surveys now on by the American company in co-operation with Imperial Airways of Great Britain, they said.

Fully loaded, the trans-Atlantic flying boats will weigh 42.5 tons, and will have a cruising range with 50 passengers of 3,200 miles. Seventy-five passengers may be carried on shorter flights.

The flying boats will carry a crew of 10, for whom complete living quarters are provided on the flight deck. They are powered by four 1,500-horsepower Wright "Cyclone" engines which, according to the company, have been in the course of secret development during the last two years.

Top speed of the flying boats is estimated at 200 miles an hour, but only about 150 miles an hour will be flown at the normal cruising range, it was said. Besides its passengers, each of the new airplanes will carry 2.5 tons of cargo.

Besides sound-proofing, air-conditioned interiors are provided for private cabins, staterooms, dining rooms and lounges.

Aeronautical engineers said the "flying clipper ships" were so big they had to be erected according to ship-building methods in enormous "docks" within factory walls, after which they are to be towed outside and assembled in "dry docks." When completed, the "clippers" will slide down the ways of an inclined ramp leading to the water, just as any big ocean liner would have to do.

## His Electric Fence

Ontario Farmer Used Hydro Power To Make It Efficient

A farmer in Brant, Ontario, found a new use for the hydro which he recently installed.

He had seen "electric fences" advertised so he ran a wire around the top of the fences of one field and connected it up with the hydro system.

Shortly after, a valuable horse put its head over the fence and he found out how his scheme worked.

It was a hundred per cent. successful in keeping livestock from breaking out of the field.

While the farmer skinned what was left of the horse, he tried to remember how lucky it was that he had not leaned against that fence or some of the kids had not climbed over it before the horse became inquisitive.

## Must Be Disappointed

Old Employee At Windsor Castle Has Seen No Ghosts

The retiring Superintendent of Works at Windsor Castle, John Lamb, states that he has seen no ghosts during his 27 years in office. He entered the Castle service, however, too late for the last recorded appearance of the Black Lady. Reputed to be the shade of Queen Elizabeth, the Black Lady is supposed to give warning of impending deaths in the Royal Family. She was last reported to have been seen in one of the corridors of the Castle a few days before the death of Queen Victoria.

Lake Baikal, in Siberia, is said to be the deepest fresh water lake in the world.

England has 1,200,000 horses, compared with 1,900,000 in 1924.

**THIS BACKACHE is AGONY!**

**KIDNEYS WILL CAUSE IT!**

Sluggish kidneys let poisons accumulate in your system. Lame back, lumbago and rheumatic pains often follow. GIN pills will give the kidneys the help they need to filter out the poisons that cause the pain. "Prove their merit through their use!" 273

**GIN PILLS FOR THE KIDNEYS**

**THE YELLOW BRIAR**

A Story of the Irish on the Canadian Countryside

By PATRICK SLATER

By arrangement with Thomas Allen, Publisher, Toronto.

CHAPTER XI.—Continued

The Marshall family were honestly concerned about my condition of health; but I told them I had got medicine to take, and, worse luck, I produced the bottle. The dose was a tablespoonful night and morning before meals. Miss Elizabeth saw to it that I took my medicine. It was horribly-bitter astringent stuff.

"I read on the label that it is good for most every ailment, Patrick, even for fainting spells," the solicitous young woman told me, with a smile. "So perhaps it will cure you!"

I kept away from the house and threw my body into hard work in an attempt to burn the fever out of my system. I can sincerely recommend a daily walk of eighteen miles between the handles of a bucking plow to any young man who is love sick—to be followed by a rest of eight hours on a hard bunk.

A day or two before Christmas that year, Samuel Arnold drove up the lane to make his expected visit on Miss Elizabeth Marshall and her family. Mr. Marshall was away to town. So I stepped out to do the honors and took the young gentleman's team. Mr. Arnold said he would go with me to the stable. It had been a long, cold cutter ride for the man—the snow crunched under foot. He came muffled up with fur cap and robes, but on alighting, his legs were stiff and numb with the cold. His purpose in coming with me, I found, was to dandify himself up for an effective stage entrance at the house. Off came the fur cap; and on he clapped a high silk plug much affected by the young Irish gentry of those days. The smart young man was wearing pants with plush stripes and a black frock coat with two buttons at the small of the back. As he fingered his bow-tie and turned to walk towards the house, it occurred to me that I might do him a kindly turn. He seemed a civil young man. He had come a long way, and was entitled to a good run for his money.

"Pardon me, sir," I said to him; "but the Marshall ladies have a prejudice against tobacco chewing. Perhaps you better wipe your chin and rid up the corners of your mouth a little."

Mr. Arnold took the suggestion kindly.

"And perhaps, too," I told him, "you better leave your plug with me. You might be forgetful and take a chew unbeknownst to yourself like!"

I carried his grip up to the house and ushered him in the front way, which had been freshly shovelled for the occasion.

That was one festive season the Marshall parlor gave useful service for its idle keep. Mr. Arnold prided himself on his deep singing voice; and his idea of a good time was to have Miss Elizabeth play hymn tunes for him on the melodeon. The man's voice vibrated the wire stems on the wax flowers and penetrated the remote fastnesses of the Marshall house. After several days of it, the committee rose and reported progress. Mr. Arnold apparently asked leave to sit again at a later date. Mrs. Marshall thought him an agreeable young man. William Marshall had tried him several times, but never struck sparks strong enough to light up a discussion of any kind. Mr. Arnold pulled on his fur cap and drove away with a cordial invitation to come again.

The Rev. James Berry—that incorrigible matchmaker—wrote the bread-and-butter letter. He reported that the young man was very favorably impressed.

Arnold returned to the Marshall farm in lilac time. As luck had it

Miss Letitia was present to make his acquaintance. On the occasion of this visit, the young man's mind was not on hymn singing. He had driven over to make arrangements about getting married. He was surprised and disappointed when Miss Elizabeth told him that, at the moment, she was not thinking of marrying any one.

It then transpired that Rev. Mr. Berry, in the heat of match-making, had overstepped his instructions and that the clergyman's limber tongue had placed young Arnold in a very awkward predicament. All his friends and neighbors over home had been told the match was made, and the whole countryside knew that Arnold was now off to attend to the details of getting married to Miss Elizabeth Marshall of Mono. An awkward affair that, was it not? Arnold argued his side of the case with great vigor, and spent a couple of days trying to persuade the young woman to take a reasonable view of the situation. Elizabeth did not see matters in his light. Aunt Letitia spoke her mind strongly on the wisdom of the girl getting a good husband with a two-hundred-acre farm all clear, now that the opportunity presented itself. Quite a bit of pressure was brought to bear on Elizabeth, but she was adamant. Altogether, a very unhappy time was had. Finally Miss Letitia had one of her weak spells; and Samuel Arnold threw up his hands and asked that his team be got ready for the road by two o'clock in the morning.

Mr. Marshall asked me if I would mind lending a hand by having the visitor's team ready at that unearthly hour. That was no task for me—it was a downright, joyful pleasure. I gave the Arnold horses oats enough to send them steaming down the road; and then I took a walk off somewhere—I was horribly distressed in spirit.

On returning, I found the house in darkness. The air was mellow with moonlight and vibrant with the rasping, pulsing hum of the tree locusts. At the gate of the snappy new picket fence, which now totters on its time-worn way, I found the cause of all the family trouble awaiting me. The girl was in her bare feet and her hair had tumbled down from a loose coil. "Why, Miss Elizabeth," said I, "I thought every one would be in bed long ago. Bob and I were waiting up to get Mr. Arnold's team ready for him."

"Oh it's heart-broken I am," she told me with a choke in her voice. "Now, now, Betty," said I to her, "it's this night time does it. The shadows will all flee away with the fairness of the morning."

"If that old thing, Letitia, would only mind her own business," she sobbed, "I know Ma would leave me alone."

The girl's face was pale in the moonlight, and she was in distress. "Why, Betty," I comforted her, "they're all interested in your welfare, and they're trying to plan the best for you."

"But I don't want to marry that conceited thing—with his singing," she burst out.

"The man might make you a good home," I counselled, "his folk are highly spoken of."

"But I don't want him!" she sobbed. "I don't want him at all. It's you I want, Paddy!"

The girl's hair got tangled up in her bare arms and seemed to blind me. I could feel the sobs shaking the curves of her soft, warm body. It was Betty taught me a woman's tears have a salty taste.

"Oh! take me," she whispered, "never to forsake me—because I love you so."

"Now, now, girl," I told her after awhile, "you'll always have Paddy as a last resort. Sure, child," said I, "you'll never be a left-over like your grand-aunt Letitia—I'll guarantee that!"

The thought touched a funny spot and broke the spell the moon was casting.

"I don't know why they are all so much concerned about my affairs," she complained, "why don't they leave a girl alone to live her own life? They must want to get rid of me!"

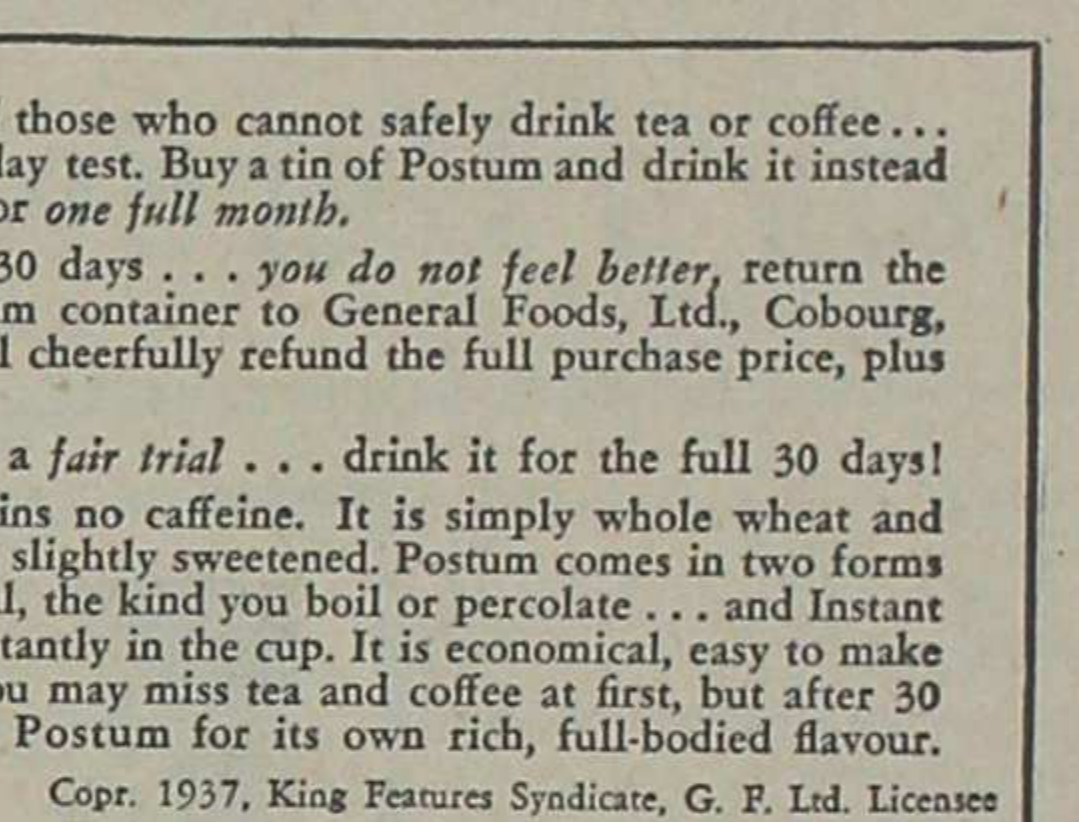

"Well," I said, with a chuckle, "they'll all be damn well concerned about your affairs, Elizabeth Ann, if that Aunt Letitia of yours spies you standing out here in the moonlight with your arms about the neck of a no-account Irish papist."

"Oh! well, anyway, you clumsy sweetheart," she smiled at me through glistening tears, "it's 'mea culpa,' Paddy, and you won't have to tell your ghostly father, John Sheridan, anything about it."

With that, she fled into the darkened house.

"Come, Bob," said I, when at last I got my breath back, "let us go and think this matter over."

It was clear as day what was the matter with Paddy Slater. He was hopelessly in love with the woman whose fresh young heart had burst open, like a flower, in wild surrender

there. In the hot heyday of his youth, his blood was tingling with a love sickness of which a country lad once sang:

"My beloved is unto me as a cluster of flowers in the vineyards of Eng-edi. . . Behold thou art fair, my love, behold thou art fair! . . . Thou hast doves' eyes. . . Thy teeth are like a flock of sheep that are even shorn which come up from the washing. . . Thy two breasts are like two roses that are twins, which feed among the lilies. . . Thy lips drop as the hohey-comb; honey and milk are under thy tongue; and the smell of thy garments is as the smell of Lebanon. . . Stay ye me with cakes of raisins, comfort me with apples; for I am sick of love!"

—Holy Bible.

And Paddy Slater knew what unhappiness that love would bring to a family to whom he was honored by ties that snubbed about the heart of a lonely barefoot orphan boy. Now, I ask you, all and sundry, what should the miserable lad have done?

I hung about the house till long after two o'clock in the morning. I could hear the heart-broken swain snoring soundly, dragging a bow over his base cord like a regular fare-you-well. Evidently the man was snugly till breakfast call. I went into my own room and packed up some working clothes in a clean grain sack.

Bob was waiting for me at the kitchen door. He was a crippled dog, worn out with the weight of his years. I felt heart-scalded to be leaving him, and I knelt down to try and explain matters.

"I'm off on a long journey, Bob, my friend," I told him.

The dog stuck his long snout into my face and whined querulously. The old fellow was suffering from a disorder that was a private matter between two gentlemen; but while I was around to do him little services, he took an interest in the affairs of the farm and got about without much discomfort. But it seemed a shame to be deserting him.

(To Be Continued)

The phrase "tickled to death" originated in a Chinese torture, when victims had the soles of their feet tickled until they died in an agony of laughter.

Two-thirds of the earth's surface is covered by water.

To Encourage Capital

Large Portion Of British Columbia Still Undeveloped

Premier T. D. Pattullo told a convention of Canadian and United States mining men British Columbia wanted to encourage capital investment because a "great portion of its area was literally unprospected."

The premier was addressing a luncheon meeting of the joint convention opened by the Canadian Institute of Mining and Metallurgy and the American Institute of Mining and Metallurgical Engineers.

He said Fort St. James was located at the geographical centre of the province, but that almost the entire area north of that point was undeveloped.

Mr. Pattullo mentioned briefly the cordial relations between Canada and the United States. He warned his listeners that "we may think ourselves safe from attack but don't forget there can never be a major world conflict without this continent being drawn into it."

He referred briefly to the proposed annexation of the Yukon Territory by British Columbia, commenting: "and we may go farther than that before we get through."

Will Follow The Sun

Portable Classrooms In London's New School Construction Scheme

Classrooms which will "follow the sun" are the sum of the London county council's new school construction scheme to be started next year.

The buildings will be of light and adaptable construction, with sliding walls, sun-roofs and portable classrooms.

Foot-baths, showers, toothbrush brigades and rest periods on portable beds will be part of the daily program.

Cooks With Sun's Rays

Using twenty panel mirrors, a California genius has devised a sun-cooker which is not only capable of cooking meats and vegetables with the sun's rays, but can generate a temperature as high as 1,000 degrees, hot enough to melt several metals.

The steel industry in the United States alone spends more than \$9,000,000 a year on research.

Foresees Big Airliners

Will Accommodate 150 Passengers States Designer Of Flying Boats

A trans-Atlantic airliner capable of accommodating 150 passengers will be built "before long" in the opinion of Oswald Short, designer of Imperial Airways' flying boats.

The liners would weigh 150 tons and have motors which would develop 6,000 horsepower. Caledonia and Cambria, the Atlantic trail blazers, weigh 19 tons and have accommodation for 30 passengers.

Short declared there would be no technical difficulties in constructing such large ships, but engines of sufficient power would take time to develop. The latest commercial airplane built at present develops only 1,500 horsepower.

The Short plant at Rochester, Kent, has already turned out 22 of the Imperial Airways' order for 28 ships by the end of this year.

Short began as a balloon enthusiast but after Orville Wright's successful flight started building aeroplanes. In 1926 he scrapped wood construction as obsolete and built the world's first all-metal flying boat.

Good Roads For Alberta

Province To Have 700 Miles Of Hard Surface Highways By End Of 1938

Alberta government expects to have 700 miles of hard surfaced roads in the province by the end of 1938, according to present plans, Hon. W. A. Fallow, minister of public works, announced.

All but a few miles of the main highway from the international border to Edmonton would be hard surfaced by the end of 1938 construction season, he said.

"Blottering" of roads is proceeding at the rate of 10 to 12 miles a week and it is expected 150 miles will be completed this year, the minister stated. About 150 miles were processed last year.

Previously hard surfacing had cost from \$10,000 to \$12,000 a mile, he asserted, but the government now was hard surfacing at a cost of not more than \$2,500 a mile. The new type of hard surfacing was similar to work now being done in the United States, he added.

A Quick Convert

A Communist agitator rode into Hyde Park, and later leaning his bicycle against the railing, mounted a soap box and proceeded to address the crowd.

"If your family is hungry," he shouted, "raid a shop and take food for them, and don't care what anybody says. If your wife hasn't got a coat, pick the best fur coat you can see, and ignore the consequences."

After several more minutes in this strain, he dismounted from his soap box, and his next words were:

"Where's the scoundrel who took my bike?"

Film Director: "The lion will pursue you for a hundred yards—no farther. You understand?"

Actor: "I understand—but does the lion?"

Little Helps For This Week

Fear ye not, stand still and see the salvation of the Lord which He will show to you to-day. Exodus 14:13.

The folded hands seem idle, But if folded at His word It is a holy service, In obedience to the Lord.

It is not the multitude of hard duties, it is not constraint and contention that advance us in our christian course. On the contrary it is the yielding of our wills without restriction and without any choice, to tread cheerfully every day in the path where the Lord leads us, to seek nothing, to be discouraged by nothing, to see our duty in the present moment, and to trust all else without reserve to the will and power of God. Godliness is the devotion of the soul to the Master, as to a living person whose will is to be its law, whose love is to be its life. It is the habit of living before the face of God, and not simply the doing of certain things.

For Public Weal

Plan To Make Medical Services Available To All Classes Of People

Challenge to the medical profession in Alberta to take the lead in formulating some plan whereby medical services would be made available to all classes of people and at a cost within their means, was made at Edmonton by Dr. T. H. Leggett of Ottawa, president of the Canadian Medical Association.

The science of medicine has advanced so rapidly, while medical economics has been almost standing still, that a serious disequilibrium has been created," Dr. Leggett asserted at a luncheon meeting of the annual convention of the Alberta branch of the association, and the College of Physicians and Surgeons of Alberta.

One of the leading tasks facing the medical profession in Canada was correction of this unbalance, Dr. Leggett emphasized.

A Japanese Pastime

Listening To Songs Of Insects Was Considered Soothing

The traditional Japanese pastime of listening to the songs of insects is threatened with extinction. Films, radio, jazz, cafes and sports provide the entertainment of modern Japan. For years regarded as a soothing comfort, the song of night-singing insects, captive in delicate bamboo cages, are appreciated by comparatively few. One known dealer still handles many bell insects, and during the spring and summer months as many as 100,000 are sold.

Almost every Japanese of moderate means owns three or four times as many pictures as he has room for on the walls of his home. They switch 'em around according to the seasons.

Great Britain's longest electric railway has just been opened between Waterloo and Portsmouth, in England, the non-stop trains covering the 74 miles in 91 minutes.

AMERICA'S CHAMPION COLLIE DOG

Lochinvar, (Irela of Glamis) America's champion collie dog, wants to get in the billiard game which his mistress, Miss Cherry Osborne of Long Island, New York, played at the Banff Springs Hotel recently. Lochinvar, himself worth \$5,000, is able to earn the meagre salary of \$50 per day as a movie star in Hollywood.

#### ROACHE—FORE

A marriage of interest took place last week at St. Anne's Church, Abbotsford, when Miss Olga Fore, the youngest daughter of Mrs. Fore and the late Mr. O. Fore became the bride of Mr. J. Roache, eldest son of Mr. and Mrs. M. Roache of Bradner.

After a reception attended by immediate relatives and friends, the young couple left for Campbell River, where they will make their home.

Both the bride and groom are widely known in the district. Mr. Roache's father operating a store at Bradner for many years, while Mrs. Roache was principal of the Bradner school for three years, and also

#### Indian Drives Car Off Road

A Cheam View Indian, proceeding from Abbotsford Saturday night, drove off the road into the deep ditch by the Zalesky blacksmith shop. The car was badly damaged, and the Indian sustained cuts about the face. He was taken into custody by Constable Davey and this week fined \$10 and \$2.50 costs for driving to the common danger.

Dean Armitage of Christ Church Cathedral, Vancouver will conduct services here next Sunday, at Abbotsford in the evening, at Bradner in the morning.

taught at other schools in the municipality.

#### Abbotsford Beat 5-0 By Kerrisdale Team

Abbotsford soccer team were decisively beaten in Vancouver last Saturday by Kerrisdale, final score being 5-0 for the city team.

Again short of players, Abbotsford played with two substitutes. The locals held the city squad for about twenty minutes, then Kerrisdale rushed the ball through, and then, after about five minutes, scored four more goals in quick succession.

The Abbotsford defence tightened and held their opponents scoreless for the balance of the game, but the Abbotsford forwards were unable to do anything about evening the score, never threatening.

Webster in goal played an excellent game, and had no chance with any of the five goals scored, while Marriette, at full back, played a fine game. The rest of the team tried hard, but lacked any semblance of passwork, due, no doubt to lack of practice together, and the fact that they were up against a more clever, better-balanced team.

Viewing the game was Doug Partridge, former Abbotsford high school teacher, and very active in soccer while here. He may possibly turn out for the Abbotsford team later this season.

A meeting will be held in the garage of the Abbotsford Bakery on Thursday evening at 7.30 to organize and elect officers for the Abbotsford junior football team club.

It is proposed to organize a team of youths under 21 years in the district, and by practice and coaching from experienced players, who have volunteered to help, form a good lineup to play matches with teams from outside points, including Vancouver junior teams.

Players wishing to turn out are

#### W. COUTTS INAUGURATES FALL FISH SEASON WITH 90-LB. CATCH

Bill Coutts came home with almost 100-lbs. of nice silvery spring salmon yesterday, caught on rod and line at (the editor's gone there today). Largest was 32-lbs, next 27-lbs., and two 17 1/2-lbs each. Fisherman Coutts is "on holidays" and spends his nights making spoons and his days plating the bottom of his favorite stream. Yesterday's catch was the largest he has ever made—and is something for a mark for anyone to aim at.

Coho and trout fishermen were out in full force on Sunday, a sizable flotilla of row-boats at the mouth of the Vedder resembling first day on the Fraser. Up stream as far as Allison's drift and spoon fishermen worked every likely spot, but few fish were taken. Water too high and dirty, some said. Worm anglers did well at Ridgedale and other bars, however, one man having three good jacks, two cohoes, a 2-lb. cutthroat, and five sizeable sea-trout—all on worm.

PROF. E. A. LLOYD

A new series of B.C.E. Farm Radiotalks will be instituted October 26, when Professor E. A. Lloyd will be the featured speaker on the first program of the sixth year of these popular farm broadcasts. Departing from the practice of evening broadcasts, the regular 15-minute farm talks will be given every Tuesday over station CBR, Vancouver at 12.30 p.m. There will be 26 of these weekly talks during the winter and they will feature outstanding agricultural speakers. In addition, a five-minute review of market trends and prices of interest to Fraser Valley farmers will be broadcast daily except Tuesday at 12.40 o'clock over the same station.

The new series has been prepared by the agricultural division of the E.C.E.R. Co. and the department of extension of the University of B. C., and all talks will be broadcast direct

but how different in  
QUALITY!

its the same with  
**BEER**

Some three years ago a song took the world by storm. It was called "Two Cigarettes in the Dark". The chorus ended with the words, "Gone is the Flame and the Spark, Leaving Just Regrets".

How often could this be said about the indiscriminate purchase of lager beer. People who just order beer are often disappointed. They find too late that there is a difference in beer—just as there is in cigarettes. Some are delightful and worthwhile—others let you down.

Most British Columbians have learned that Lucky Lager is a better beer. It is good to the last drop because it's made that way.
